Windle,2024-05-21 This open access edited book attempts to break new ground in investigating multiple facets of Vietnamese language education and change in global contexts engaging with global Vietnam through complex lenses of language and education Issues of language globalization and global identities have often been framed through the lens of hierarchical binary power relations and or through a dichotomy between hyper central languages such as English and revisualized or marginalized local language and cultures In this book this dichotomy is turned on its head by considering how Vietnam and Vietnamese are constructed in and outside Vietnam and enacted in global spaces of classrooms textbooks student mobility community engagement curriculum and intercultural contacts Vietnamese is among the world s most spoken languages and is ranked in the top 20th in terms the number of speakers Yet at the same time as a peripheral or southern global language as often seen in the Global North Global South spectrum the dynamics of multilingual and multicultural encounters involving Vietnamese generate distinctive dilemmas and tensions as well as pointing to alternative ways of thinking about global phenomena from a fresh angle Rather than being outside of the global Vietnamese like many other non central global languages is present in diasporas commercial and transnational structures of higher education schooling and in the more conventional settings of primary and secondary school in which visions of culture and language also evoke notions of heritage and tradition as well as bring to the fore deep seated ideological conflicts across time space communities and generations Relevant to students and scholars researching language education identity multiculturalism and their intersections particularly related to Vietnam but also in Southeast Asia and beyond this volume is a pioneering investigation into overlooked contexts and languages from a global southern oriented perspective This book presents an eclectic collection of 15 chapters unified by an interest in developing and teaching the Vietnamese language To my knowledge there has been no previous attempt to make the national language of Vietnam a focus for as many perspectives as are documented in the book In this regard the book makes an original and intriguing contribution to the literature on Vietnamese culture including the culture of Vietnam s expanding diaspora The book is pioneering in the extent to which it draws attention to the many roles played by a national language in a nation s political social and cultural development It also documents the challenges of preserving a national language in settings where it is at risk of being marginalized It is pleasing that so many of the contributing authors are young Vietnamese scholars who can provide a distinctly Vietnamese perspective on concepts and practices of global significance Dr MartinHayden Emeritus Professor of Higher Education Southern Cross University

Australia Vietnamese Language Education and Change In and Outside Vietnam brings together an excellent collection of chapters that highlight the diverse and important but under explored roles Vietnamese language plays in different settings within and outside Vietnam The fifteen chapters of this much needed book provide unique insights into various aspects and meanings of Vietnamese language Collectively the volume contributes to broadening our view about the evolution and transformation of Vietnamese language under the impacts of local national regional and global forces The book invites readers to engage in a reflective and intersectional approach to rethinking and re examining our understandings of the changes and developments of Vietnamese language over the history of the country Dr Ly Tran Professor Centre for Research for Educational Impact REDI Deakin University Australia and Founder Australia Vietnam International Education Centre

The Restoration of Sunnism Ogden Goelet, Sameh Iskander, 2022-03-01. The Restoration of Sunnism is a study of the early history of Islamic law schools's madrasa, pl mad ris and their professors in late F imid and Aiy bid Egypt 495 647 1101 1249. It describes the origin and spread of these institutions, their teachers, and their role in the religious life of Egypt. This work is a lightly revised version of the author's 1976 University of Pennsylvania doctoral dissertation, which remains one of the most important works on the history of the premodern institution of the madrasa to date. Unlike many publications on the mad ris in recent decades, which argue that medieval Islamic legal education was informal and lacked structure, the present work endeavors to detect the elements of structure and order in the institution of the madrasa and in its educational curricula and the practices associated with it. Leiser's ground-breaking work stands out for its attention to detail and to the political, economic, and religious background of twelfth and thirteenth century Egypt.
