Operations Manual Pizza:

Franchising in America Thomas S. Dicke, 1992 Using a series of case studies from five industries Dicke analyzes franchising a marketing system that combines large and small firms into a single administrative unit strengthening both in the process He studies the franchise industry from the 1840s to the 1980s closely examining the rights and obligations of both the parent company and the franchise owner A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value Franchise Opportunities Handbook, 1994 This is a directory of companies that grant franchises with detailed information for each listed franchise **Franchise Opportunities Handbook** United States. Domestic and International Business Administration, 1985 This is a directory of companies that grant franchises with detailed information for each listed franchise **Guide to Quality Management Systems for the Food Industry** Ralph Early, 2012-12-06 Whenever I step into an aeroplane I cannot avoid considering the risks associated with flying Thoughts of mechanical failure pilot error and terrorist action fill my mind I try to reassure myself with statistics which tell me there is greater chance of injury crossing the road The moment the plane takes off I am resigned to my fate placing faith in pilots who are highly qualified and superbly trained for the task of delivering me safely to my destination To be a passenger in an aeroplane is to express faith in the systems used by the airline It is to express a faith in the quality of the airline's organisation and the people who work within it The same is true of surgery Thoughts of mortality are difficult to avoid when facing the surgeon's knife However faith in the surgeon's training and skill faith in the anaesthetist and theatre technicians faith in the efficient resources and quality of the hospital all help to convince that there is little need to worry Apart from flying and surgery there are many facets of life which entail risk but knowing the risks we willingly place our confidence in others to deliver us safely In the consumption of food however few of us consider the risks Everyday if we are fortunate we eat food Food sustains and gives us pleasure Food supports our social interactions *Labour Relations in the Global Fast-Food Industry* Tony Royle, Brian Towers, 2004-08-02 The fast food industry is one of the few industries that can be described as truly global not least in terms of employment which is estimated at around ten million people worldwide This edited volume is the first of its kind providing an analysis of labour relations in this significant industry focusing on multinational corporations and large national companies in ten countries the USA Canada the UK the Netherlands Germany Australia New Zealand Singapore and Russia The extent to which multinational enterprises impose or adapt their employment practices in differing national industrial relations systems is analysed Results reveal that the global fast food industry is typified by trade union exclusion high labour turnover unskilled work paternalistic management regimes and work organization that allows little scope for developing workers participation in decision making let alone advocating widely

companies employing many workers formed the bedrock of the U S economy Today on the list of big business s priorities sustaining the employer worker relationship ranks far below building a devoted customer base and delivering value to investors As David Weil s groundbreaking analysis shows large corporations have shed their role as direct employers of the people responsible for their products in favor of outsourcing work to small companies that compete fiercely with one another The result has been declining wages eroding benefits inadequate health and safety protections and ever widening income inequality From the perspectives of CEOs and investors fissuring splitting off functions that were once managed internally has been phenomenally successful Despite giving up direct control to subcontractors and franchises these large companies have figured out how to maintain the quality of brand name products and services without the cost of maintaining an expensive workforce But from the perspective of workers this strategy has meant stagnation in wages and benefits and a lower standard of living Weil proposes ways to modernize regulatory policies so that employers can meet their obligations to workers while allowing companies to keep the beneficial aspects of this business strategy *Hospitality Law* ,2001
