MOPAR ALL WEATHER AIRCONTROL SYSTEM

The Mopar All Weather Aircontrol heating and ventilating system assures comfortable driving conditions in all four seasons of the year. Specially designed doors on the sides of the front compartment provide heated fresh air to both the front and rear compartments of the car. See pages 2 and 3 for operation of the various control buttons.

COMFORT IN COLD WEATHER—In cold weather, heated fresh air is available with the roof ventilator open. Still more heat can be obtained through forced circulation by the fans.

Under severe cold weather conditions ample heat is supplied for defrostering the windshield even with the controls set for maximum heat output.

The fresh air intake permits leaving the roof ventilator open in rain, snow or dust, reducing humidity and steamy or fogging windows. Greater circulation of air may be had by turning on the heater fans with the weather door closed and the heat regulated according to comfort requirements.

COMFORT IN HOT WEATHER—In city traffic, forced fresh air ventilation is supplied by the fans with the roof ventilator open, the weather door closed.

At highway speeds in fair weather, when more ventilation is required in the front compartment, ventilator. During wet weather, however, keep the weather door closed to keep rain from dripping on the floor.

While the MOPAR All Weather Aircontrol system is designed primarily as a fresh air heating unit, it may be used to recirculate the air within the car with the roof ventilator door and the windows closed. This may be desirable at times for shutting out obnoxious odors. To operate the system in this manner, simply open the weather door and pull out the fan control button.

MOPAR COMFORT MASTER FRESH AIR HEATING SYSTEM

The MOPAR Comfort Master fresh air heating system provides year-round comfortable driving conditions. An even distribution of heated air across the floorboards and toward the rear compartment is obtained by the use of a permanent opening and correctly placed baffles in the heater unit.

IN COLD WEATHER—Heated fresh air is available even in severe weather. This is made possible by the large capacity heater and the fresh air intake which permits you to drive with the roof vents later open.

Ample heat is also provided, under severe cold weather conditions, for defrostering the windshield. ventilator open and the weather door closed for providing fresh air within the car.

In rain, snow or dust you can drive with the roof ventilator open and the weather door closed for reducing humidity and steamy windows and for providing fresh air within the car.

IN WARM WEATHER—In city traffic or on the highway fresh air will circulate throughout the car through the roof ventilator and weather doors. A still greater volume of air may be obtained within the car by using the fans for forced circulation. Obnoxious odors can be shut out without having to endure stagnant air by closing the roof ventilator and the car windows and using the fans to recirculate the air in the car.

MOPAR COMFORT MASTER HEATER

The MOPAR Comfort Master heater provides even distribution of heated air across the floorboards and toward the rear compartment for home-like comfort for the driver and passengers. This large capacity heater is capable of heating and defrostering at the same time. Even with the defroster wide open, in under extreme icing conditions, heated air will pour into the front compartment. Under ordinary driving conditions adequate defrostering is secured with the defroster control only partially open, permitting practically the entire output of the heater to be directed into the car.

MOPAR DELUXE HEATER

With the MOPAR Deluxe heater, a heated air stream is directed where needed from three independently operated doors. Full force of heated air can be directed, if desired, to the driver's feet or to the passenger or to both. Quick defrostering is also secured even with all the heat outlets open. The heater and defroster controls are conveniently located on the instrument panel. The heater fan is controlled by a 3-speed pull type switch. Pull the switch button out to the first notch for low speed, the second notch for medium speed and all the way out for high speed.

MOPAR RADIOS

The model 800 radio is an eight tube set provided with electric push button tuning. Color tone control is also employed for tone tuning at night. The model 802 radio is a six tube set with automatic push button tuning and tone control.

FOUR BUTTON ADJUSTMENT—(Model 800) 1—Pull off push button covers and depress No. 1 button. 2—Tune station in manually. 3—Pull out knurled end of button and turn it for loudest, clearest reception. Check station by operating button to identify the program. 4—Set remaining buttons in like manner. 5—If necessary, adjust push button compensator near the antenna socket for maximum volume with push button No. 1 pushed in (Model 802) 1—Pull off push button covers and unlock settings by turning the knurled knobs counter-clockwise about one turn. 2—Push in bottom button as far as it will go and, while holding it in this position, tune in station manually. 3—Sliding the button in, tighten the knurled knob gently. Then release button and tighten the knob securely. 4—Proceed in the same manner for the remaining buttons.
