

Directions: On an AP Psychology exam you would have 50 minutes to answer BOTH of the essay questions. Here is one question. It should take you no longer than 25 minutes to complete just one. Keep this in mind as you write (pen and paper) out your answer. It is not enough to answer a question by merely listing facts. You should present a cogent argument based on your critical analysis of the questions posed, using appropriate psychological terminology. Please refer to the writing guidelines I am including with this essay. We will be going over your answers in class next week.

1. Dr. Franklin investigated the relationship between stress and physical illness. She persuaded a high school principal to require all female athletes in the school to participate in her study. She explained the purpose of her research to the athletes and asked them to use a standard form to rate the severity of their stress over the last six months. More than 250 athletes completed the form. Then Dr. Franklin analyzed the forms returned by the first 100 athletes. She requested the attendance records from the nurse's office for each of those athletes to verify the number of days absent due to illness during the same six-month period. In the debriefing summary that Dr. Franklin sent to the 100 athletes after she completed the study, she stated that athletes who reported more stress also experienced more frequent illness. Dr. Franklin concluded that stress causes physical illness.

- Identify the research method used by Dr. Franklin.
- Describe the operational definitions of the TWO key variables that Dr. Franklin used in the study.
- Based on the information provided, describe ONE appropriate and ONE inappropriate ethical feature of the study.
- Identify ONE statistical technique that Dr. Franklin could use to represent the relationship between the variables in the study.
- Describe TWO aspects of research design that weaken the validity of Dr. Franklin's conclusion that stress causes physical illness.

Selected Essays by Frank H. Knight, Volume 1 Frank H. Knight, 1999 Frank H Knight 1885 1972 was a central figure many say the dominant influence in the development of the Chicago School of Economics at the University of Chicago in the 1930s and 1940s where he taught future Nobel laureates Milton Friedman James Buchanan George Stigler and many other notable scholars It was Knight s embedded skepticism about the reach of economic knowledge that set the stage for the laissez faire economics that matured at the University in the 1950s and 1960s But as important as Knight s technical economic contributions were he never strayed far from his broad philosophical interests and concern for the state of modern liberal democracy Ross B Emmett s selection of Knight s essays is the first to offer a comprehensive picture of the work of this notable social scientist over the span of his career Included are not only Knight s most influential writings but also a number of uncollected papers which have not previously been widely accessible These essays illustrate Knight s views on the central debates regarding economics social science ethics education and modern liberalism Volume 1 What is Truth in Economics contains fifteen of Knight s papers up through 1940 Volume 2 Laissez Faire Pro and Con includes fourteen of Knight s papers from 1940 through 1967 including Socialism The Nature of the Problem and The Sickness of Liberal Society These twenty nine essays together stand not only as a monument to one of economics most significant and original thinkers but will also serve as an invaluable resource for economists philosophers and political scientists interested in the development of the western liberal tradition The Arizona Teacher ,1925 *The Saturday Review of Politics, Literature, Science and Art* ,1861 **The Monist** ,1904 Vols 2 and 5 include appendices Education and Work Louise F.
