

What is professionalism in the context of being a student in a doctor of physical therapist degree program?

In its general sense, professionalism refers to upholding personal profession to its highest standard. As a student in a doctor of physical therapy program, I view professionalism as a platform for continuously expanding my knowledge regarding rehabilitation, making strides in order to communicate with patients and colleagues alike, upholding a set of fair and ethical morals. I believe that a certain commitment to the duties aforementioned will certainly shape what my future brings as a graduate student, while serving as a rehabilitation professional.

Without a doubt, without knowledge, no progress can be expected. A person who is considered as ignorant to old-fashioned or traditional treatment methods will help in treating patients. As somebody who is pursuing a career in this field, I will be looking forward to discovering new methods in treating a patient who is suffering discomfort. It has always been my understanding that there is no such thing as learning enough, because circumstances and scenarios will always be new at any day. Therefore, I believe in individualized treatments.

As human beings, we are subject to new sets of laws and rules which take place so as to prevent chaos, and at the same time serving as protection. Being a Physical Therapy student is no special. As a matter of fact, we are even expected to follow the standards at a stricter degree because we need to deal with people who have to go through chronic pain everyday. Back during my internship, I had the opportunity to work together with patients, guiding them, explaining to them conditions that they need to be aware of. Even though it was quite challenging, I believe that it was an amazing learning experience for me, as I understood the importance of communication.
