Pyrrhonian Reflections on Knowledge and Justification Robert J. Fogelin,1994-09-22 This work written from a neo Pyrrhonian perspective is an examination of contemporary theories of knowledge and justification It takes ideas primarily found in Sextus Empiricus s *Outlines of Pyrrhonism* restates them in a modern idiom and then asks whether any contemporary theory of knowledge meets the challenges they raise The first part entitled *Gettier and the Problem of Knowledge* attempts to rescue our ordinary concept of knowledge from those philosophers who have assigned burdens to it that it cannot bear Properly understood Fogelin shows that the concept of knowledge is unproblematic The second part of this study called *Agrippa and the Problem of Justification* examines Agrippa s contribution to Pyrrhonism a systematic reduction of its procedures which came to be known as the *Five Modes Leading to the Suspension of Belief* These modes present a completely general procedure for refuting any claim a dogmatist might make Though largely unnoticed there is according to Fogelin an uncanny resemblance between problems posed by Agrippa s *Five Modes* and those that contemporary epistemologists address under the heading of a theory of justification Fogelin examines the strongest contemporary theories of justification in both foundationalist and anti foundationalist forms The conclusion is that recent philosophical writings on justification have made no significant progress in responding to the Pyrrhonian problems these

Communication in Modern Social Ordering Kai Eriksson, 2011-07-21

Communication in Modern Social Ordering investigates the modern history of communication in relation to the thinking of the political community in the United States. By illustrating the intertwining of the technological developments in communication methods and its community building effects, the different representations of society and their political implications are examined against the development of communication systems from the telegraph to the telephone to computer networks. It was the telegraph that made communication a continual process, thus freeing it from the rhythmical motion of the postal service and from physical transportation in general, and provided both a model and a mechanism of control. Using the theories of both Foucault and Heidegger to provide a lens for new investigation, the author studies not the meanings of communication and its logic as such, but rather the conditions and structures that allow meanings and logic to be formulated in the first place. The book offers an original combination of historical analysis with an ontological discussion of the evolution of telecommunications in the U.S. as a phenomenon of modern social ordering.

Quoting Corinthians Edward W. Watson,Martin M. Culy,2018-12-12 Imagine reading a letter where the writer is engaged in a heated debate with someone and repeatedly cites their positions but never uses quotation marks to indicate that he is quoting them This is precisely what we find in 1 Corinthians Paul frequently quotes certain factions within the church and then proceeds to correct their faulty thinking but he rarely explicitly tells us that he is quoting them This poses a significant challenge for interpreters of this letter How do we know when Paul is stating his own position rather than quoting a Corinthian position that he actually rejects Quoting Corinthians sets forth a step by step process for evaluating potential quotations in the New Testament and then applies that process to eleven passages in 1 Corinthians where quotations may occur As the first book length attempt to establish more objective criteria for identifying quotations Quoting Corinthians is a valuable resource for students and scholars alike who are seeking to rightly interpret the New Testament
