Evers, 2016-11-10 Questioning Leadership offers a diverse mix of cutting edge research in the field of educational leadership with contributions from expert and emerging leadership scholars It contextualises school leadership within broader social and historical contexts and traces its influence on school performance through time from its relatively modest role within a systems theory paradigm to its growing influence from the 1980s onwards as exercising leadership came to be perceived as being largely responsible for improving educational outcomes This book invites the reader to challenge the current orthodoxy of leader centrism and instead reflect more broadly on the various structural and institutional interrelationships that determine how a school functions successfully It poses challenging questions such as Is leadership really necessary for high quality school performance Can schools function effectively without leadership Is it possible to describe the work that principals do without using the word leadership How do we challenge the assumption that leadership simply exists and that it is seen as the appropriate default explanation for school performance This book does not assume

that leadership is the key to organisational performance although it acknowledges the work that principals do It goes against current orthodoxy and offers varied perspectives on how leadership might be repositioned vis vis organisational and institutional structures It also suggests some new directions for leading and learning and throws open a discussion on leadership that for too long has been captured by the assumption that the leader is the cause of organisational performance and learning outcomes in schools At a time when leadership s dominance seems unshakeable this is a bold book that should appeal to postgraduate students of educational leadership and management those undertaking training in educational administration and current school leaders interested in exploring the value of leadership for educational organisations

Leadership and Literacy Neil Dempster,Tony Townsend,Greer Johnson,Anne Bayetto,Susan Lovett,Elizabeth Stevens,2017-04-01 This book focuses on what school leaders need to know and understand about leadership for learning and for learning to read in particular It brings together theory research and practice on leadership for literacy The book reports on the findings from six studies that followed school principals from their involvement in a professional learning program consisting of five modules on leadership and the teaching of reading to implementation action in their schools It describes how they applied a range of strategies to create leadership partnerships with their teachers pursuing eight related dimensions from a Leadership for Learning framework or blueprint The early chapters of the book feature the use of practical tools as a focus for leadership activity These chapters consider for example how principals and teachers can develop deeper understandings of their schools contexts how professional discussions can be conducted with a process called disciplined dialogue and how principals might encourage approaches to shared leadership with their teachers The overall findings presented in this book emphasise five positive positions on leadership for learning to read the importance of an agreed moral purpose sharing leadership for improvement understanding what learning to read involves implementing and evaluating reading interventions and recognising the need for support for leaders learning on the job

Decision Making in Educational Leadership Stephanie Chitpin,Colin W. Evers,2014-06-05 The increased focus on raising standards in education requires leaders to engage in complex decision making about teacher assessment mandated accountability measures and the collection and use of large amounts of data Showcasing exemplary practices of school and district administrators Decision Making in Educational Leadership covers issues concerning the role of emotion ethical and legal ramifications the use of data and complexity in decision making Chapter authors in this research based volume explore what administrators and school leaders actually know about educational problems how they draw upon and revise theories of action for responding to problems and which theories are tenable in educational decision making This important resource provides a broad and international perspective on effective models and methods of educational decision making and shares valuable knowledge about how theory can be translated into practice in a variety of school settings
