history of architecture and architects in socialist Poland is described not only from the perspective of an architectural historian and researcher but also from the perspective of active participants in the events described. The text is based on historical sources and literature as well as on numerous interviews with architects and urban planners who played an important role in post war reconstruction implementation of the socialist realist doctrine creation of the most significant buildings and monuments and development of the local version of socialist modernism or post modernism. It gives the floor back to those whose voice was hardly heard after the collapse of the socialist system in 1989. The book should become an interesting source of information for those interested in the material culture of former socialist countries. Although it focuses on socialist Poland it can be used as material for comparative studies of mutual relations between East and West in post war Europe as well as for analysis of the situation of architecture and architects in socialist countries.
