Rolls Royce Merlin liquid cooled V 12 piston aero engine is considered an icon of British engineering with a worldwide recognition. It was one of the most successful aircraft engines of the Second World War period and its incremental development ran hand in hand with that of the legendary Supermarine Spitfire to which it was fitted from the very beginning. From its genesis in the 740hp PV 12 engine that was first flown in 1935, the Merlin went through rapid development during the war years until in its ultimate version the Merlin 130 series designed specifically for the de Havilland Hornet, it produced over 2 600hp. Merlin engines powered many more of the best known Allied combat aircraft of the war including the Hawker Hurricane, Boulton Paul Defiant, P 51 Mustang, Avro Lancaster, Handley Page Halifax and the de Havilland Mosquito. Many variants of Merlin were built by Rolls Royce at their factories in Derby, Crewe and Glasgow as well as by Ford of Britain at their Trafford Park factory near Manchester. The Packard V 1650 was a license built version of the Merlin made in the United States. When Merlin production finally ceased in 1950, almost 150 000 engines had been delivered.

Canberra: The Greatest Multi-Role Aircraft of the Cold War (Volume 1) Ken Delve, John Sheehan, 2022-07-02. The Canberra introduced the RAF to the era of jet bombers. It was adopted by air forces from South America, India, Australia, New Zealand and the US as the Martin B 57. Beautifully illustrated with many rare and unpublished photographs. Of interest to aviation and military historians, modellers, gamers and flight simulator enthusiasts. An aviation legend designed in the mid 1940s, the English Electric Canberra entered service in 1951 with RAF Bomber Command. It served in the conventional interdiction and nuclear bomber role with the RAF, Germany, the Middle East and the Far East. Its performance and adaptability made it ideal as a reconnaissance aircraft and the final version, the Canberra PR 9, only finally retired in July 2006. The Canberra was used in many support roles, especially in signals and electronic warfare. The Canberra was adopted by air forces from South America to Africa and India as well as Australia and New Zealand and licence built as the Martin B 57. It was involved in conflicts from the Suez Crisis and the Malayan Emergency and various other hot spots with the RAF to the Australian and USAF ops in Vietnam and even the Indo-Pakistani War when both sides used Canberras and the 1982 Falklands War. Used in trials and evaluation, the Canberra held various height and speed records and NASA's High Altitude Research Program WB 57s are still active. The Canberra is beloved by many dedicated enthusiasts and aircraft or cockpits still survive in museums as well as some in flying condition.
