In this case, leave the unit for a few hours with the power left ON, and restart the operation after the condensation has dried up.

The typical period for which the memory can be backed up while the power cord is unplugged or the POWER key is set to the OFF position is about 3 weeks, though this may be variable depending on the surrounding environment.

In case of long hours of power failure or slipping out of the power cord, the data related to recording and editing (that is usually recorded at the moment the Mini Disc is ejected) may be cleared or destroyed before it is written in the Mini Disc. Remember that the data lost cannot be recovered.

After recording or editing, be sure to eject the Mini Disc so that the recording or editing data can be written in the disc.
