

Developmental Psychology

UNIT OVERVIEW

Developmental psychologists study the life cycle, from conception to death. Unit 9 covers physical, cognitive, and social development over the life span and introduces two major issues in developmental psychology: (1) whether development is best described as gradual and continuous or as a discontinuous sequence of stages and (2) whether the individual's personality remains stable or changes over the life span. The issue of the relative impact of genes and experience on behavior is the subject of Unit 3C. This unit also explores how genes and environment interact to shape both the biological and social aspects of our gender.

There is a great deal of information to learn in this unit, including many terms and a number of important research findings. Pay particular attention to the stage theories of Jean Piaget, Lawrence Kohlberg, and Erik Erikson, as well as to the discussion regarding intellectual stability during adulthood.

NOTE: Answer guidelines for all Unit 9 questions begin on page 253.

UNIT REVIEW

First, skim this section, noting headings and boldface items. After you have read the section, review each objective by completing the sentences and answering the questions that follow it. As you proceed, evaluate your performance by consulting the answers beginning on page 253. Do not continue with the next section until you understand each answer. If you need to, review or reread the section in the textbook before continuing.

Introduction (p. 411)

Objective 1: State three areas of change that developmental psychologists study, and identify the three major issues in developmental psychology.

1. Scientists who study physical, cognitive, and social changes throughout the life cycle are called _____.
2. One of the major issues in developmental psychology concerns the relative importance of genetic inheritance and experience in determining behavior; this is called the _____ and _____ issue.
3. A second developmental issue concerns whether developmental changes are gradual or abrupt; this is called the _____ and _____ issue.
4. A third controversial issue concerns the consistency of personality and whether development is characterized more by _____ over time or by change.

Prenatal Development and the Newborn (pp. 411–415)

Objective 2: Discuss the course of prenatal development and the destructive impact of teratogens, and describe some abilities of the newborn.

1. Conception begins when a woman's _____ releases a mature _____.
2. The few _____ from the man that reach the egg release digestive _____ that eat away the egg's protective covering. As soon as one sperm penetrates the egg, the egg's surface _____ all other sperm.
3. The egg and sperm _____ fuse and become one.

CliffsNotes AP Psychology Cram Plan Joseph M. Swope, 2020-08 *CliffsNotes AP Psychology Cram Plan* calendarizes a study plan for AP Psychology test takers depending on how much time they have left before they take the May exam

Developmental Psychology KHRITISH SWARGIARY, 2025-05-01 *Developmental Psychology* is a foundational text meticulously crafted to meet the academic needs of undergraduate students pursuing Education at Gauhati University under the Four Year Undergraduate Programme FYUGP. This book has been designed to provide a comprehensive understanding of the fundamental concepts, theories, and practical insights of developmental psychology, aligning seamlessly with the prescribed syllabus for the B.A. 5th Semester course. It explores the multifaceted process of human development across various life stages, offering a detailed analysis of physical, cognitive, emotional, social, and personality development. By emphasizing the critical role of family, school, and peers, this text provides learners with a holistic perspective on human growth. The content is systematically organized into five well-structured chapters. The first chapter, *Introduction to Developmental Psychology*, introduces learners to the essential concepts, scope, and various methods used in studying developmental psychology, with a special focus on prenatal development, its stages, and influencing factors. The second chapter, *Infancy*, delves into the characteristics and diverse developmental aspects of this initial stage of life, including physical, cognitive, motor, language, and emotional development. It further explores how parental attitudes and the family environment significantly impact an infant's growth. The third chapter, *Childhood*, provides insights into the characteristics and developmental tasks of childhood, emphasizing the influence of family and school on social and personality development. The fourth chapter, *Adolescence*, examines the meaning, characteristics, and developmental tasks associated with this critical phase of life. It highlights the significant physical, intellectual, and emotional changes that adolescents experience, making it a period of profound transformation. Finally, the fifth chapter, *Social, Emotional, and Personality Development of Adolescence*, explores the vital aspects of social, emotional, and personality development during adolescence, shedding light on the role of family, school, and peers. This chapter also addresses adjustment challenges and the issue of juvenile delinquency. With a learner-centered approach, this book ensures that complex concepts are explained in a clear, engaging, and accessible manner. Each chapter is enriched with practical examples, conceptual clarity, and critical insights, encouraging students to think analytically and apply theoretical knowledge to real-world scenarios. This text is not only an academic resource but also a guide for understanding the intricate process of human development. It is my sincere hope that this book serves as a valuable resource for students, educators, and anyone interested in developmental psychology. Constructive feedback from readers is always welcome, as it will serve as a guiding force for future improvements. Khritish Swargiary, May 2025. **AS Psychology**
