

## The True Purpose of Education

The purpose of a universal public education system can be debated, but originally, in the 1830's, Horace Mann reformed the American school system in order to give all children the basis on which to learn and become judicious citizens. As public schooling has evolved throughout the years, the purpose of education has been slowly vanishing, being replaced by monotonous routines and pointless activities done by students that no longer are interested in learning, but getting good grades instead.

The true purpose of learning isn't being addressed properly in schools, and it isn't being recognized by those who attend school in order to learn. In 'An Education', by Ralph Waldo Emerson, Emerson paints a picture of what an education is supposed to provide for a pupil. He writes, "The function of opening and feeding the human mind is not to be filled by any mechanical or military method...you must not neglect the form, but secure the essentials" (para. 9).

In a sense, Emerson argues that the purpose of education is, not to mold a judicious citizen that has basic understanding of certain topics, but to guide and ultimately unleash the genius and determination in every man by giving them the essentials to learning. On the other hand, Mann in 'Report of the Massachusetts Board of Education' uses the analogy of Feudalism to show that when education is not made a mandatory opportunity for all, society gets broken into classes, like Feudalism, in which the rich and powerful abuse the poor and uneducated.

Here we see a specific clash of opinions on what education is supposed to provide for an individual person, and a society. Although Emerson's essay may seem less subjective than Mann's, I believe Emerson holds a more broad understanding of what an education can give to a person. There are many cases in which twelve years of public school do not provide a student with the passion or direction in order to live a life full of learning and accomplishment, when twelve years of public education doesn't provide an exceptional education.

The solution might not be to end public schooling, but to begin public acceptance of young students becoming avid learners instead of teacher's pets, self advocates instead of disabled pupils. Leon Botstein in 'Let Teenagers Try Adulthood' proposes that the answer to such an out of date and flawed institution is a world where sixteen year olds are "prepared to be taken seriously and to develop the motivations and interests that will serve them well in adult life" (para. 11). Being a 16 year old myself, I often wonder hat that would be like; if other adults didn't know I attend high school or if that was completely irrelevant to begin with. As this is a nice thought, it is also a minor detail in the larger scheme of things. I find the solution of empowering students to be curious and to seek out what they want from

## **Purpose Of Education Essay Example:**

Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael Timpone, Roger W. Benjamin, 2000  
Why do America's public schools seem unable to meet today's social challenges? As competing interest groups vie over issues like funding and curricula, we seem to have lost sight of the democratic purposes originally intended for public education. Public schools were envisioned by the Founders as democratically run institutions for instilling civic values, but today's education system seems more concerned with producing good employees than good citizens. Meanwhile, our country's diversity has eroded consensus about citizenship, and the professionalization of educators has diminished public involvement in schools. This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education. Nine original articles by some of today's leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived. It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic. The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship. An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey. A second group identifies flaws in how schools are currently governed and offers models for change. A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy. Spanning philosophy, history, sociology, and political science, this book brings together the best current thinking about the specifics of education policy: vouchers, charter schools, national testing, and about the role of deliberation in a democracy. It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future.
