Multilevel Models Jichuan Wang, Haiyi Xie, James F. Fisher, 2011-12-23 Interest in multilevel statistical models for social science and public health studies has been aroused dramatically since the mid 1980s New multilevel modeling techniques are giving researchers tools for analyzing data that have a hierarchical or clustered structure Multilevel models are now applied to a wide range of studies in sociology population studies education studies psychology economics epidemiology and public health This book covers a broad range of topics about multilevel modeling The goal of the authors is to help students and researchers who are interested in analysis of multilevel data to understand the basic concepts theoretical frameworks and application methods of multilevel modeling The book is written in non mathematical terms focusing on the methods and application of various multilevel models using the internationally widely used statistical software the Statistics Analysis System SAS Examples are drawn from analysis of real world research data The authors focus on twolevel models in this book because it is most frequently encountered situation in real research These models can be readily expanded to models with three or more levels when applicable A wide range of linear and non linear multilevel models are introduced and demonstrated

Fuzzy Database Modeling with XML Zongmin Ma, 2006-06-15 Fuzzy Database Modeling with XML aims to provide a single record of current research and practical applications in the fuzzy databases This volume is the outgrowth of research the author has conducted in recent years Fuzzy

Database Modeling with XML introduces state of the art information to the database research while at the same time serving the information technology professional faced with a non traditional application that defeats conventional approaches The research on fuzzy conceptual models and fuzzy object oriented databases is receiving increasing attention in addition to fuzzy relational database models With rapid advances in network and internet techniques as well the databases have been applied under the environment of distributed information systems It is essential in this case to integrate multiple fuzzy database systems Since databases are commonly employed to store and manipulate XML data additional requirements are necessary to model fuzzy information with XML Secondly this book maps fuzzy XML model to the fuzzy databases Very few efforts at investigating these issues have thus far occurred Fuzzy Database Modeling with XML is designed for a professional audience of researchers and practitioners in industry This book is also suitable for graduate level students in computer science

Climate Change and Small Island States Jon Barnett, John Campbell, 2010-08-12 Small Island Developing States are often depicted as being among the most vulnerable of all places to the effects of climate change and they are a cause celebre of many involved in climate science politics and the media Yet while small island developing states are much talked about the production of both scientific knowledge and policies to protect the rights of these nations and their people has been remarkably slow This book is the first to apply a critical approach to climate change science and policy processes in the South Pacific region It shows how groups within politically and scientifically powerful countries appropriate the issue of island vulnerability in ways that do not do justice to the lives of island people It argues that the ways in which islands and their inhabitants are represented in climate science and politics seldom leads to meaningful responses to assist them to adapt to climate change Throughout the authors focus on the hitherto largely ignored social impacts of climate change and demonstrate that adaptation and mitigation policies cannot be effective without understanding the social systems and values of island societies

Probabilistic Aspects of Life Prediction , **Probabilistic Aspects of Life Prediction** W. Steven Johnson, B. M. Hillberry, 2004 As fatigue and fracture mechanics approaches are used more often for determining the useful life and or inspection intervals for complex structures realization sets in that all factors are not well known or characterized Indeed inherent scatter exists in initial material quality and in material performance Furthermore projections of component usage in determination of applied stresses are inexact at best and are subject to much discrepancy between projected and actual usage Even the models for predicting life contain inherent sources of error based on assumptions and or empirically fitted parameters All of these factors need to be accounted for to determine a distribution of potential lives based on combination of the aforementioned variables as well as other factors The purpose of this symposium was to create a forum for assessment of the state of the art in incorporating these uncertainties and inherent scatter into systematic probabilistic methods for
