systems products and materials are available in the market to meet the corresponding criteria The result is a comprehensive guideline that enables MEP engineers to develop a C2C inspired design It covers design criteria system selection system sizing design for deconstruction as well as material and product selection for the main MEP disciplines and sets out a number of criteria by which the aptness of a design for C2C can be measured **FPGA-Based Embedded System**

Parking Management Best Practices
 Todd Litman, 2020-03-04 This book is a blueprint for developing an integrated parking plan It explains how to determine
 parking supply and affect parking demand as well as how to calculate parking facility costs It also offers information about
 shared parking parking maximums financial incentives tax reform pricing methods and other management techniques What
 types of locations benefit from parking management Places with perceived parking problems Areas with rapidly expanding
 population business activity or traffic Commercial districts and other places with compact land use patterns Urban areas in
 need of redevelopment and infill Places with high levels of walking or public transit or places that want to encourage those
 modes Districts where parking problems hinder economic development Areas with high land values Neighborhoods
 concerned with equity including fairness to nondrivers Places with environmental concerns Unique landscapes or historic
 districts in need of preservation *Enhanced Trustworthiness and End User Acceptance of Conditionally Automated
 Vehicles in the Transition Period* Daniel Watzenig, Lisa-Marie Schicker, 2020-12-08 A key factor for the introduction of

conditionally automated vehicles is a high level of trust in and acceptance of these vehicles by the end user To bring such so called TrustVehicles on the road the end users and their expectations have to be strongly taken into consideration by for instance developing driver interfaces as well as reliable and robust automated driving controllers The main topics of the book are ranging from the question of how these TrustVehicles should behave and interact with users the development of reliable sense plan act approaches the whole verification procedures starting with simulation to studies on the driving simulator and the verification on a test track All these steps together provide an overall picture and pave the way to trustworthy and reliable automated vehicles so called TrustVehicles
