Velarde, Roman Yu. Tarakanov, Alexey V. Marchenko, 2018-03-28 This book commemorates the 70th birthday of Eugene Morozov the noted Russian observational oceanographer It contains many contributions reflecting his fields of interest including but not limited to tidal internal waves ocean circulation deep ocean currents and Arctic oceanography Special attention is paid to studies on internal waves and especially those on tidal internal waves in the Global Ocean These papers describe the most important open problems concerning experimental studies of internal waves and their theoretical numerical and laboratory modeling Further contributions investigate the physics of surface waves and their interaction with internal waves Here the focus is on describing interaction processes between internal waves and deep currents in the ocean especially currents of Antarctic Bottom Water in abyssal fractures They also touch on the problem of oceanic circulation and related processes in fjords including those occurring under sea ice Given its breadth of coverage the book will appeal to anyone interested in a survey of ocean dynamics ranging from historic perspectives to modern research topics *UNEP Year Book 2011*, 2011 The 8th Edition of the UN Environment Programme flagship report The UNEP Year Book 2011 examines global emerging issues and provides the latest environmental science it also highlights major environmental events and developments over the past year and presents the most recent data and indicator trends The ocean has become a global repository for much of the waste we produce Scientists are concerned that plastic debris in the ocean can transport toxic substances which may end up in the food chain causing potential harm to ecosystems and human health The Year Book also explores the wider implications of the use of phosphorus in food production Phosphorus is an essential nutrient whose supply is limited Since demand for fertilizer

in agriculture rocketed in the 20th century large amounts of phosphorus are flowing into the environment New perspectives are also emerging on how biodiversity conservation can be integrated in forest management Forests are receiving increasing attention not least because of their role in climate change mitigation Halting loss of forest biodiversity is essential if forests are to adapt to mounting pressures including climate change and pest outbreaks The Year Book s overview of events and developments during 2010 shows how cutting edge science reveals new opportunities to mitigate climate change while improving air quality Stimulated by technological innovation and green investments renewable energy supply is growing rapidly This and other developments are summarized in key environmental indicators that present the latest data and trends

For The global environment **Oceans** Guy Jacques,Paul Tréguer,Herlé Mercier,2021-03-05 Since the HMS Challenger expedition of 1872 1876 our vision of the ocean has changed completely We now understand that it plays a key role in biodiversity climate regulation and mineral and biological resources and as such the ocean is a major service provider for humanity Oceans draws on data from new oceanographic and satellite tools acquired through international interdisciplinary programs It describes the processes that control how the ocean functions on different spatial and temporal scales After considering the evolution of concepts in physical chemical and biological oceanography the book outlines the future of a warmer acidified less oxygenated ocean It shows how a view of the ocean at different scales changes how we understand it Finally the book presents the challenges facing the ocean in terms of the exploitation of biological and mineral resources in the context of sustainable development and the regulation of climate change Geophysics and Ocean Waves Studies Khalid S. Essa,Marcello Di Risio,Daniele Celli,Davide Pasquali,2021-03-17 The book Geophysics and Ocean Waves Studies presents the collected chapters in two sections named Geophysics and Ocean Waves Studies The first section Geophysics provides a thorough overview of using different geophysical methods including gravity self potential and EM in exploration Moreover it shows the significance of rock physics properties and enhanced oil recovery phases during oil reservoir production The second section Ocean Waves Studies is intended to provide the reader with a strong description of the latest developments in the physical and numerical description of wind generated and long waves including some new features discovered in the last few years The section is organized with the aim to introduce the reader from offshore to nearshore phenomena including a description of wave dissipation and large scale phenomena i e storm surges and landslide induced tsunamis This book shall be of great interest to students scientists geologists geophysicists and the investment community *Energy and Water Development Appropriations for 2011* United States. Congress. House. Committee on Appropriations. Subcommittee on Energy and Water Development,2010 A Book of Waves Stefan Helmreich,2023-07-03 In A Book of Waves Stefan Helmreich examines ocean waves as forms of media that carry ecological geopolitical and climatological news about our planet Drawing on ethnographic work with oceanographers and coastal engineers in the Netherlands the United States Australia Japan and Bangladesh Helmreich details how scientists at sea and in the lab apprehend waves materiality through

abstractions seeking to capture in technical language these avatars of nature at once periodic and irreversible wild and pacific ephemeral and eternal For researchers and their publics the meanings of waves also reflect visions of the ocean as an environmental infrastructure fundamental to trade travel warfare humanitarian rescue recreation and managing sea level rise Interleaving ethnographic chapters with reflections on waves in mythology surf culture feminist theory film Indigenous Pacific activisms Black Atlantic history cosmology and more Helmreich demonstrates how waves mark out the wakes and breaks of social histories and futures Advancing Ocean Observing Technology and Industry - Science Partnerships for the Future of Ocean Science Ole Mikkelsen,Paula Bontempi,Alex Nimmo-Smith,Wayne Homer Slade,Ho Kyung Ha,2022-03-21

UNEP Year Book ,2011 Overview of major global and regional environmental issues and development that shaped policy decisions and actions during the course of the year Emerging challenges new findings presenting scientific progress made in the year that may assist society in recognizing and better understanding emerging environmental issues and help decision makers in designing adequate responses GEO indicators highlighting some of the key global and regional environmental issues and trends that have been identified in GEO reports **Biological Sampling in the Deep Sea** Malcolm R. Clark,Mireille Consalvey,Ashley A. Rowden,2016-04-18 The deep sea covers over 60% of the surface of the earth yet less than 1% has been scientifically investigated There is growing pressure on deep sea resources and on researchers to deliver information on biodiversity and the effects of human impacts on deep sea ecosystems Although scientific knowledge has increased rapidly in recent decades there exist large gaps in global sampling coverage of the deep sea and major efforts continue to be directed into offshore research Biological Sampling in the Deep Sea represents the first comprehensive compilation of deep sea sampling methodologies for a range of habitats It reviews the real life applications of current and in some instances developing deep sea sampling tools and techniques In creating this book the authors have been able to draw upon the experiences of those at the coal face of deep sea sampling expanding on the existing methodological texts whilst encompassing a level of technical detail often omitted from journal publications Ultimately the book will promote international consistency in sampling approaches and data collection advance the integration of information into global databases and facilitate improved data analyses and consequently uptake of science results for the management and conservation of the deep sea environment The book will appeal to a range of readers including students early career through to seasoned researchers as well as environmental managers and policy makers wishing to understand how the deep sea is sampled the challenges associated with deep survey work and the type of information that can be obtained *Proceedings of the Fourth World Conference on Floating Solutions: WCFS 2024; 2-4 December; Hong Kong* Xiao Lin Zhao,Jian-Guo Dai,Siwei Liu,Soon Heng Lim,2025-06-24 This book highlights recent research and development in floating solutions for sustainable ocean development and blue economy It covers the following key topics Architecture climate change and disaster environmental enhancement food security and food sustainability innovation and technology renewable energy urban

Heessen, Niels Daan, Jim R. Ellis, 2023-09-14 The atlas presents a unique set of abundance data to describe the spatial depth size and temporal distribution of demersal and pelagic fish species over an extensive marine area together with accounts of their biology A large number of pictures graphs and distribution maps illustrate the text By largely avoiding or at least explaining scientific terms and providing extensive references the book should be useful for both laymen and scientists The quantitative information on some 200 fish taxa is derived from 72 000 stations fished by research vessels during the period 1977 2013 The area covers the northwest European shelf from west of Ireland to the central Baltic Sea and from Brittany to the Shetlands Although the surveys extend beyond the shelf edge only taxa reported at least once in waters less than 200 m are included Typical deep water species and typical fresh water species are excluded We hope this publication will contribute to gaining a better understanding of the ocean ecosystems **Estuarine and Coastal Hydrography and Sediment Transport** R.
