expertise from both fields in studying the effect of cosmos on the earth and its inhabitants **Redefining Geek** Cassidy Puckett,2022-04-20 A surprising and deeply researched look at how everyone can develop tech fluency by focusing on five easily developed learning habits Picture a typical computer geek Likely white male and someone you'd say has a natural instinct for technology Yet after six years teaching technology classes to first generation low income middle school students in Oakland California Cassidy Puckett has seen firsthand that being good with technology is not something people are born with it's something they learn In Redefining Geek she overturns the stereotypes around the digitally savvy and identifies the habits that can help everyone cultivate their inner geek Drawing on observations and interviews with a diverse group of students around the country Puckett zeroes in on five technology learning habits that enable tech savvy teens to learn new technologies a willingness to try and fail management of frustration and boredom use of models and the abilities to use design logic and identify efficiencies In Redefining Geek she shows how to measure and build these habits and she demonstrates how many teens historically marginalized in STEM are already using these habits and would benefit from recognition for their talent access to further learning opportunities and support in career pathways She argues that if we can develop recognize and reward these technological learning habits in all kids especially girls and historically marginalized racial and ethnic groups we can address many educational inequities and disparities in STEM Revealing how being good with technology is not about natural ability but habit and persistence Redefining Geek speaks to the ongoing conversation on equity in technology education and argues for a more inclusive technology learning experience for all students

Ploughshares and Swords Jayita Sarkar,2022-07-15 India's nuclear program is often misunderstood as an inward looking endeavor of secretive technocrats In Ploughshares and Swords Jayita Sarkar challenges this received wisdom narrating a global story of India's nuclear program during its first forty years The book foregrounds the program's civilian and military features by probing its close relationship with the space program Through nuclear and space technologies India's leaders served the technopolitical aims of economic modernity and the geopolitical goals of deterring adversaries The politically savvy transnationally connected scientists and engineers who steered the program obtained technologies materials and information through a variety of state and nonstate actors from Europe and North America including both superpowers They thus maneuvered around Cold War politics and the choke points of the nonproliferation regime Hyperdiversification increased choices for the leaders of the nuclear program but reduced democratic accountability at home The nuclear program became a consensus enforcing device in the name of the nation Ploughshares and Swords is a provocative new history with global implications It shows how geopolitical and technopolitical visions influence decisions about the nation after decolonization Thanks to generous funding from the Swiss National Science Foundation the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress cornell.edu cornell open and other repositories

Psychology in Everyday Life David G. Myers, 2014-01-20 David Myers' briefest introduction to psychology speaks to all students regardless of their background or level of preparedness with no assumptions made in the vocabulary examples or presentation. Students of all kinds are comfortable with Myers' manageable chapters which include careful connections to associated visuals comparative tables and research based pedagogy. For this edition there is something completely new to a Myers' text. David Myers personally selected new coauthor Nathan DeWall's enthusiasm for teaching and writing about psychological science makes him uniquely suited to join the world's bestselling psychology textbook author. And with about 30 more pages of coverage this edition has become an even stronger and more complete introduction to the science of psychology for courses of all kinds.

Discriminatory Bullying Esoh Elamé, 2013-06-20 This book is devoted to the relation between bullying at school and ethnicity gender sexual orientation and disability. In examining the interactions between bullying and discrimination the authors set out from the premise that the current practice of intercultural education does not systematically address the issue of bullying as evidenced by the lack within schools of intercultural education projects. The starting point for the work is a survey conducted in ten European countries on a sample of about 9 000 students including immigrants and natives. The research provides important information on which factors deserve special attention when formulating interventions in the classroom with the aim of preventing or combating discriminatory bullying. If intercultural education is called upon to handle the fight against any form of discrimination it cannot shirk from addressing the issue of bullying discrimination. The results represent a sound stimulating basis for broad and realistic reflections on discriminatory bullying and intercultural education and show that intercultural pedagogy needs to be appropriately equipped theoretically. This book will be an indispensable tool for those seeking a thorough understanding of the new challenges facing intercultural education and the means of overcoming them. On that basis innovative education practices should be developed with the aim of spreading a culture of non violence and intercultural dialogue.
