policymaking in India from 1947 to 2016 with a focus on the developments after 1964 when the Kothari Commission was constituted. The book is informed by the rare insights acquired by the author while making policy at the state, national and international levels of governance. Another distinguishing feature of this book lies in the attention it pays to the process and politics of policymaking and the larger setting or, to use jargon, the political and policy environment in which policies were made at different points of time. The author brings out a crucial analysis of the Indian educational system against the backdrop of national and global political, economic and educational developments. Two other distinguishing features of the book are the systematic treatment of the regulation of education and the role of judiciary in the making and implementation of education policies.
