NOVA WEIGH

Model 500 digital weight indicator

The Model 500 is a compact competitively priced panel mounting weight indicator that delivers excellent weighing performance plus a host of useful communication features. This combination makes it the perfect choice for hopper and vessel weighing applications where connectivity to PLCs and other types of control system is required.

The fast 50 conversions per second ADC makes it ideal for batching and dosing applications. Filtering can be adjusted to suppress signal fluctuations due to mechanical vibration etc.

Connectivity

The Model 500 is equipped with a serial port that can be used for RS232, 422 or 485 communications. This port can be connected to a printer to record weight data, a remote display or a PLC/computer control system. Data flow is bi-directional and setpoint values can be written to the indicator from the PLC or computer.

The ModBus™ protocol is supported making for easy interfacing to most PLCs etc. An internal option card (replacing the 4-20 mA option) allows connection to a Profibus-DP network. Alternatively, multiple indicators can be connected to a Model 300 fieldbus gateway providing a choice of Profibus-DP, DeviceNet™, TCP/IP and other popular fieldbus protocols.

Via an optional Fieldbus Gateway, Profibus, DeviceNet™, TCP/IP and other popular protocols are all available.

Digital inputs and outputs

Two setpoints are provided. These are solid-state switches with a maximum load of 100 mA at 24 Vdc. The hysteresis setting is menu selectable.

The digital inputs can be used for Tare, Zero and Print commands.

Calibration and setting

The Model 500 has an easily learnt menu-driven set-up procedure using the keys on the front of the instrument.

Alternatively the instrument can be set up using a PC and a Windows based software package. One benefit of the PC approach is the availability of a 'data sheet' calibration mode. This allows the unit to be calibrated according to the m/V/V performance of the load cell selected and avoids the need for dead weights or other calibration references.
