The Science of Managing Our Digital Stuff Ofer Bergman, Steve Whittaker, 2016-11-11 Why we organize our personal digital data the way we do and how design of new PIM systems can help us manage our information more efficiently Each of

us has an ever growing collection of personal digital data documents photographs PowerPoint presentations videos music emails and texts sent and received To access any of this we have to find it The ease or difficulty of finding something depends on how we organize our digital stuff In this book personal information management PIM experts Ofer Bergman and Steve Whittaker explain why we organize our personal digital data the way we do and how the design of new PIM systems can help us manage our collections more efficiently Bergman and Whittaker report that many of us use hierarchical folders for our personal digital organizing Critics of this method point out that information is hidden from sight in folders that are often within other folders so that we have to remember the exact location of information to access it Because of this information scientists suggest other methods search more flexible than navigating folders tags which allow multiple categorizations and group information management Yet Bergman and Whittaker have found in their pioneering PIM research that these other methods that work best for public information management don't work as well for personal information management Bergman and Whittaker describe personal information collection as curation we preserve and organize this data to ensure our future access to it Unlike other information management fields in PIM the same user organizes and retrieves the information After explaining the cognitive and psychological reasons that so many prefer folders Bergman and Whittaker propose the user subjective approach to PIM which does not replace folder hierarchies but exploits these unique characteristics of PIM

Pervasive Information Systems Panos E Kourouthanassis, George M Giaglis, 2016-09-16 Today's ubiquitous computing technology is imbedded in everyday objects from cars to clothes to shipping containers whose location context and state can be monitored instantly processed and acted upon This new volume in the Advances in Management Information Systems series provides an in depth review of the state of the art practices and research opportunities in a new era where information technology resides in physical space Written for both scholars and practitioners Pervasive Information Systems is organized into three sections each investigating a distinct part of the subject Part I focuses on the design challenges of Pervasive Information Systems PS and discusses issues relating to the coordination of PS through middleware structures as well as issues related to the efficient deployment of PS Part II discusses the challenges and limitations of deploying pervasive technologies to support domestic corporate and public systems Part III presents two emerging research fields of PS design for aesthetics and PS evaluation

Something Incredibly Wonderful Happens K. C. Cole, 2009 As a young man Frank Oppenheimer followed in his famous brother's footsteps growing up in a privileged Manhattan household becoming a physicist working on the atomic bomb Tragically Frank and Robert both had their careers destroyed by the Red Scare But their paths diverged While Robert died an almost ruined man Frank came into his own emerging from ten years of exile on a Colorado ranch to create not just a multimillion dollar institution but also a revolution that was felt all over the world His Exploratorium was a museum of human awareness that combined art and science while it encouraged play experimentation and a sense of joy and wonder its success inspired a transformation in museums around the globe In many

ways it was Frank's answer to the atom bomb K C Cole a friend and colleague of Frank's for many years has drawn from letters documents and extensive interviews to write a very personal story of the man whose irrepressible spirit would inspire so many
