

NYS LAB: Relationships and Biodiversity

A Laboratory Activity for the Living Environment

Introduction:

Abies balsamea is a common plant species in gardens. **Abies** is a common word for finding various parts of leaves. Commonly, it is produced in the laboratory. *Abies balsamea* grows very slowly, which is the characteristic of species that are likely to produce a lot of offspring.

Abies balsamea is most closely related to *Abies balsamea* and most likely to produce the important subspecies *Abies*. These other plant species that are closely related to *Abies* may be related to *Abies balsamea*. You will learn about this relationship.

- get a **relationship and evolutionary relationship** to determine which plant species is most closely related to the experimental species, *Abies balsamea*.
- use this relationship to decide which plant species is most likely to produce a lot of offspring (the important subspecies *Abies*).
