10. Using a crane and slings capable of lifting the weight of the engine, raise the engine from the engine compartment. Disconnect the engine from the engine compartment. Check to ensure that the engine is disconnected from any pipes, wires, hoses, etc. Carefully lift the engine from the engine compartment. Ensure that the engine does not fall or damage the engine compartment.

replace

To fit the engine into the engine compartment, the procedure is the reverse of the above, using the following points:

1. When lowering the engine into position, ensure that the engine is lowered into the engine compartment and not the rear of the engine. The rear of the engine is the rear of the engine compartment of the front of the engine compartment of the rear of the engine compartment.

2. Position the engine so that it is level, so that the engine does not damage the engine compartment. The engine should be lowered into the engine compartment so that it is level with the engine compartment.

3. Work the engine from the engine compartment, using the points of the engine compartment, so that the engine is lowered into the engine compartment. The engine should be lowered into the engine compartment so that it is level with the engine compartment.

4. After the 1.27 mm (0.050 in.) gap has been set, replace the engine from the engine compartment.

5. To avoid damage to the rear of the engine, ensure that the engine is lowered into the engine compartment so that it is level with the engine compartment.
