Part science vessel and part fleet cruiser, the Avian has amassed a respectable operational record since it was introduced into service. Avian crews paid a terrific price during the Dominion War and were often used as a screening command ship with two or three Mandukar's at the point of a main body of Warbirds. They were often singled out for destruction by the Cardassians because of their reputation of dishing out a healthy rate of disruptor fire. As science vessels, the Avians typically operate with one or two Vastam-class scouts as a mini task force in unexplored space. In this role they have been modestly successful and are one of the longer ranged vessels in the Romulan inventory. For any Romulan officer looking to expand his experience in the science fields, there are few better assignments than an Avian.

Of the 40 Avian-class cruisers built, 18 remain in active service. 19 have been destroyed, two have been scrapped and one is listed as missing, presumed destroyed. The class is notable for the unique paint schemes that the yard workers apply to the "bird" pattern on each vessel's dorsal hull. These colorful works of art are a point of pride for Avian crews and a contributing factor to the high morale that these ships enjoy.

It isn't quite clear when the Battlehawk-class cruiser first entered the Romulan Fleet inventory, but it is easy to say that the design has nearly exceeded its usefulness as a fleet asset. Her shields are woefully underpowered in the face of modern firepower and her ability to provide serious weapons fire is modest at best. For sure, the Battlehawks are sturdy vessels and are useful in a number of fleet support roles, but their time is quickly coming to a close. Even upgrading the class as a whole has been deemed unfeasible, and in the next ten years half of the existing vessels will most likely be relegated to museum status or scrapped. The remaining vessels may either serve out their operational lifespan or be relegated to reserve status.

Obviously, the class was the inspiration behind the Warbird-class, though the Battlehawk is barely half the size of that impressive class. Nonetheless, the two are often confused on long range scans, and the Romulans have used this in the past to mask fleet movements against Starfleet along the Neutral Zone or the Dominion during that conflict. In this, it can be said, the Battlehawks still provide a modest service to the Empire.

Of the 90 Battlehawk-class cruiser constructed to date, 44 remain in active service. 23 have been destroyed, six are listed as missing, presumed destroyed, seven have been scrapped and 10 have defected to the Romulan Free States. Construction of the class ended sometime in the early 2350s.
