

TORQUE, ROTATION, AND EQUILIBRIUM PROBLEMS

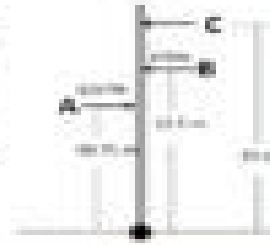

Problem 1

Two masses are suspended from a horizontal beam by two strings. The beam is supported by a central pivot. The left mass is 2.0 kg and the right mass is 3.0 kg. The distance from the pivot to the left mass is 1.0 m and to the right mass is 1.5 m. Calculate the tension in each string.

Problem 2

A uniform beam of length 4.0 m and mass 10.0 kg is supported by a pivot at its left end. A 20.0 kg mass is suspended from the right end. Calculate the reaction force at the pivot.

Problem 3

A uniform beam of length 4.0 m and mass 10.0 kg is supported by a pivot at its left end. A 20.0 kg mass is suspended from the right end. Calculate the reaction force at the pivot.

Fuchs,2016-05-09 Addressing structures this book presents a classic discipline in a modern setting by combining illustrated examples with insights into the solutions It is the fruit of the author s many years of teaching the subject and of just as many years of research into the design of optimal structures Although intended for an advanced level of instruction it has an undergraduate course at its core Further the book was written with the advantage of having massive computer power in the background an aspect which changes the entire approach to many engineering disciplines and in particular to structures This paradigm shift has dislodged the force flexibility method from its former prominence and paved the way for the displacement stiffness method despite the multitude of linear equations it spawns In this book however both methods are taught the force method offers a perfect vehicle for understanding structural behavior bearing in mind that it is the displacement method which does the heavy number crunching As a rule the book keeps things as simple as possible conveying the basic ideas and refraining from lengthy calculations wherever possible Further it endeavors to unify the approach showing that whatever applies to simple springs is equally valid for intricate frames In addition to various design considerations it also addresses

several topics relating to optimal structures that will be of interest to students and teachers of structures Chapter-wise NCERT + Exemplar + Practice Questions with Solutions for CBSE Physics Class 11 2nd edition Disha Experts, 2017-08-29
