Software Services for e-Business and e-Society Claude Godart, Norbert Gronau, Sushil Sharma, G r me Canals, 2009-09-29 I3E 2009 was held in Nancy France during September 23-25 hosted by Nancy University and INRIA Grand Est at LORIA. The conference provided scientists and practitioners of academia, industry, and government with a forum where they presented their latest findings concerning application of e-business, e-services, and e-society and the underlying technology to support these applications. The 9th IFIP Conference on e-Business, e-Services, and e-Society sponsored by IFIP WG 6.1 of Technical Committees TC6 in cooperation with TC11 and TC8 represents the continuation of previous events held in Zurich, Switzerland in 2001; Lisbon, Portugal in 2002; Sao Paulo, Brazil in 2003; Toulouse, France in 2004; Poznan, Poland in 2005; Turku, Finland in 2006; Wuhan, China in 2007; and Tokyo, Japan in 2008. The call for papers attracted papers from 31 countries from the five continents. As a result, the I3E 2009 program offered 12 sessions of full paper presentations. The 31 selected papers cover a wide and important variety of issues in e-Business, e-services, and e-society including security, trust, and privacy, ethical and societal issues, business organization, provision of services as software and software as services, and others. Extended versions of selected papers submitted to I3E 2009 will be published in the International Journal of e-Adoption and in AIS Transactions on Enterprise Systems. In addition, a 500 euro prize was awarded to the authors of the best paper selected by the Program Committee. We thank all authors who submitted their papers, the Program Committee members, and external reviewers for their excellent work.

The topics covered by the papers of the SARS and the MLSC workshop demonstrate the breadth and the richness of the respective fields of the two workshops, stretching from robot programming to languages and compilation techniques to real-time and fault tolerance to dependability, software architectures, computer vision, cognitive robotics, multi-robot coordination and simulation to bio-inspired algorithms and from machine learning for anomaly detection to model construction in software product lines to classification of web service interfaces. In addition, the SARS workshop hosted a special session on the recently launched KOROS project on collaborating robot systems that is borne by a consortium of researchers of the faculties of architecture and planning, computer science, electrical engineering, and information technology, and mechanical and industrial engineering at the Vienna University of Technology. The four papers devoted to this session highlight important research directions pursued in this interdisciplinary research project.
