1. As you worked down the dichotomous classification key to identify sharks, did you go from general to specific characteristics or from specific to general characteristics? Explain your answer using four characteristics that were used in the shark key.

You should be going from general to specific characteristics. Many sharks look alike, but some of very distinctive features. Removing those from your options will allow you to examine specific details that separate one group from another. Four characteristics that should be used include body shape, body appendages, gill number, and various fin conditions (presence of, size, length, etc.).

2. Which main characteristics could be used to distinguish shark 4 from shark 8?

The main difference between sharks 4 and 8 was is that shark 4 (Carcharhinidae) has an anal fin, whereas shark 8 (Squalidae) does not.
