Schoch,2004-05-24 Is it a mere coincidence that pyramids are found throughout our globe Did cultures ranging across vast spaces in geography and time such as the ancient Egyptians early Bud dhists the Maya Inca Toltec and Aztec civilizations of the Americas the Celts of the British Isles and even the Mississippi Indians of pre Columbus Illinois simply dream the same dreams and envision the same structures Robert M Schoch one of the world s preeminent geologists in recasting the date of the building of the Great Sphinx believes otherwise In this dramatic and meticulously reasoned book Schoch like anthropologist Thor Heyerdahl in his classic Kon Tiki argues that ancient cultures traveled great distances by sea Indeed he believes that primeval sailors traveled from the Eastern continent primarily Southeast Asia and spread the idea of pyramids across the globe particularly to the New World of the Americas where they abounded until the days of the Conquistadors Patterns of Disengagement Alan J. Berkowitz,2000 While the customary path to achievement in traditional China was through service to the state from the earliest times certain individuals had been acclaimed for repudiating an official career This book traces the formulation and portrayal of the practice of reclusion in China from the earliest times through the sixth century by which time reclusion had taken on its enduring character Those men who decided to withhold their service to state governance fit the dictum from the Book of Changes of a man who does not serve a king or lord he elevates in priority his own affairs This characterization came to serve as a byword of individual and voluntary withdrawal the image of the man whose lofty resolve could not be humbled for service to a temporal ruler Men who eschewed official appointments in favor of pursuing their own personal ideals were known by such appellations as hidden men yinshi disengaged persons yimin high minded men gaoshi

and scholars at home chushi What distinguished these men was a particular strength of character that underlay their conduct they received approbation for maintaining their resolve their mettle their integrity and their moral and personal values in the face of adversity threat or temptation This book reveals that those who opted for a life of seclusion had a variety of motivations for their decisions and conducted widely divergent ways of life The lives of these men epitomize the distinctive nature of substantive seclusion differentiating them from those of the intelligentsia who on occasion voiced their desire for disengagement or for retreat but who nevertheless found or retained their places in government office Throughout the author places the recluse and seclusion within the social political intellectual religious and literary contexts of the times

The Confucian Concept of Learning Duck-Joo Kwak, Morimichi Kato, Ruyu Hung, 2019-12-18 What does the Confucian heritage mean to modern East Asian education today Is it invalid and outdated or an irreplaceable cultural resource for an alternative approach to education And to what extent can we recover the humanistic elements of the Confucian tradition of education for use in world education Written from a comparative perspective this book attempts to collectively explore these pivotal questions in search of future directions in education In East Asian countries like China Japan Korea and Taiwan Confucianism as a philosophy of learning is still deeply embedded in the ways people think of and practice education in their everyday life even if their official language puts on the Western scientific mode It discusses how Confucian concepts including rote learning and conformity to authority can be differently understood for the post liberal and post metaphysical culture of education today The contributors seek to make sense of East Asian experiences of modern education and to find a way to make Confucian philosophy of education compatible with the Western idea of liberal education This book was originally published as a special issue of Educational Philosophy and Theory

Name and Actuality in Early Chinese Thought John Makeham,1994-07-22 This is the first Western study of the philosophy of Xu Gan 170 217 a Confucian thinker who lived at a nodal point in the history of Chinese thought when Han scholasticism had become ossified and the creative and independent quality that characterized Wei Jin thought was just emerging As the theme of his study Makeham develops an original and richly detailed account of ming shi name and actuality one of the key pairs of concepts in early Chinese thought He shows how Xu Gan s understanding of the name and actuality relationship was most immediately influenced by Xu Gan s understanding of why the Han dynasty had collapsed yet had its roots in a tradition of discourse that spanned the classical period circa 500 150 B C E In reconstructing the philosophical background of Xu Gan s understanding of the relationship between name and actuality Makeham identifies two antithetical theories of naming in early Chinese thought nominalist and correlative a distinction that is as great as the Realist Nominalist distinction of Western thought He shows how Xu Gan s views on the name and actuality relationship were animated on the one hand by a rejection of nominalist theories of naming and on the other hand by a novel appropriation of correlative theories of naming The study also analyzes two of the more immediate social and intellectual issues in the late Eastern Han 25 220 period that had prompted Xu Gan to discuss the name and actuality relationship the ethos of the scholar gentry ming jiao and Han approaches to classical scholarship Makeham demonstrates how Xu Gan s critique of these matters is valuable not only as a late Han philosophical account of what had led to the demise of the 400 year old Han dynasty but also as a mode of conceptualizing that contributed to the new direction that philosophical thinking took in the third century C E
