Dick,2003 As one of the oldest scientific institutions in the United States the US Naval Observatory has a rich and colourful history This volume is first and foremost a story of the relations between space time and navigation from the rise of the chronometer in the United States to the Global Positioning System of satellites for which the Naval Observatory provides the time to a billionth of a second per day It is a story of the history of technology in the form of telescopes lenses detectors calculators clocks and computers over 170 years It describes how one scientific institution under government and military patronage has contributed through all the vagaries of history to almost two centuries of unparalleled progress in astronomy Sky and Ocean Joined will appeal to historians of science technology scientific institutions and American science as well as astronomers meteorologists and physicists **Zeus: Zeus, god of the bright sky** Arthur Bernard Cook,1914 **Human Vision and The Night Sky** Michael Borgia,2006-12-11 For years the images have blazed through your imagination They are the magnificent full color photographs returned by the Hubble Space Telescope and 1 its sister Great Observatories of the grand depths of the cosmos From the pillars of creation considered to be Hubble's signature image to the incomprehensible depths of the Hubble Deep Fields to the intricate details imaged in the surface and cloud tops of Mars or Jupiter the power of the Hubble Telescope to turn on the public to science is unparalleled in the history of modern culture They also have spurred new telescope sales to unimaginable highs And after years of watching the heavens through the eyes of NASA you've decided it's time to see it for yourself You make the trip to the department store and pick up that shiny new 500 telescope set it up and soon you're in business Unfortunately the high initial expectations usually give way to disappointment Instead of seeing the magnificent swirling clouds of gas in the Orion Nebula you see a pale green gray cloud with a couple of nondescript stars lurking nearby The swirling red yellow and brown storms of Jupiter are nowhere to be seen only varying shades of gray in the planet's cloud bands assuming you can see bands at all And Mars After waiting all night for the red planet to rise up over the morning horizon you are greeted by nothing more than a featureless reddish orange dot
