Implementing NCLB Paul Kimmelman, 2006-03-23 Implementing NCLB is an important guide to thinking about how to create the infrastructure to support sustained school improvement Kimmelman's extensive experience as an educator coupled with his understanding of policymaking and research allow him to transcend the silos that too often constrain thinking about these issues Andrew J Rotherham Co Director Education Sector Senior Fellow Progressive Policy Institute Member Virginia Board of Education This inspirational book provides a convincing and compelling call to action Kimmelman provides plenty of practical examples and moves easily between specific applications and the big picture Michael Fullan Professor OISE University of Toronto I believe this book should be read by every administrator and teacher leader It provides a framework for schools to address the need for continuous school improvement in order to meet the expectations of NCLB Theron J Schutte Superintendent Boone Community School District IA How can NCLB directives be successfully applied to school improvement efforts Meeting the requirements of NCLB is a monumental task In a concise straightforward manner author Paul L Kimmelman shows readers how to overcome this challenge by building organizational capacity through a knowledge model This model provides a simple but effective framework for evidence based continuous improvement that complies with the fundamental underpinnings of NCLB Key features include A context setting overview of the politics and education initiatives that led to NCLB An analysis of what educational leadership means in an age of accountability Lessons in leadership from educators scientists explorers and entrepreneurs Practical examples reflective questions and action ideas to help link concepts to specific applications Recommended resources publications and products to help build organizational capacity Intended for educators and administrators who have an active role in leading their school or district improvement activities this book will also be an essential resource for focusing the efforts of school improvement and learning teams

Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children's love of games songs and movement he's proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It's no longer just their teacher's math It's their math America's children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That's acknowledged in the use it or lose it aphorism that states the obvious that

we remember what we use and forget what we don't You know that to be true if you've ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like 5 7 12 17 8 9 6 X 7 42 and 56 7 8 and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget

Tested Linda Perlstein, 2025-03-14 The pressure is on at schools across America In recent years reforms such as No Child Left Behind have created a new vision of education that emphasizes provable results uniformity and

greater attention for floundering students Schools are expected to behave more like businesses and judged almost solely on the bottom line test scores To see if this world is producing better students Linda Perlstein immersed herself in a suburban Maryland elementary school The resulting portrait detailed human and truly thought provoking is marked by the same narrative gifts and expertise that made *Not Much Just Chillin* so illuminating The school once deemed a failure is now held up as an example of reform done right Perlstein explores the rewards and costs of that transformation through the experiences of the people who lived it Nine year olds meditate to activate their brains before exams and kindergartners write paragraphs Teachers attempt to address diverse needs at the same time they are expected to follow daily scripts and feel compelled to focus on topics that will be tested at the expense of those that won't The principal attempts to keep it all together in the face of immense challenges Perlstein provides the first detailed view of how new education policies are modified by human realities Tested will be talked about thought about written about and will almost certainly play an important role in the national debate as the federal education law come up for renewal
