Renewing the fuel filter

Environment

Avoid spillage and use a suitable container. Used fuel must be disposed of as specified in national and international law.

The instructions apply to the renewal of both the pressure filter and the return filter.

1. Unscrew the filter cover with a socket wrench with hexagon driver, e.g. 587 637, so as not to damage the filter cover.
2. Lift out the filter cover and filter element. The filter housing will drain automatically. This applies only if the fuel tank is lower than the engine. Otherwise the fuel shut-off cock must be closed first.
3. Undo the removed filter element from the cover by carefully bending it to one side.
4. Renew the O-ring in the cover. Lubricate the O-ring with O-ring grease.
5. Check that the filter housing is drained of fuel. Contaminated fuel may enter the injectors if the drainage does not work.
6. Press a new filter element into the snap fastener in the cover.
7. Fit the filter element and cover in the filter housing. Tighten the cover to 25 Nm (18 lbf ft).
8. Bleed the fuel system after renewing the water separating filter.

IMPORTANT!

Fit the filter elements in the filter covers before placing them in the fuel filter housings or the filter elements may be damaged.
