with a Circular Aperture Seichoong Chang, 1969 A preliminary study of the scattering behavior of a spherical shell with a circular aperture is presented The shell is assumed to be perfectly conducting and infinitesimally thin and is illuminated by a plane electromagnetic wave symmetrically incident upon the aperture Several different approaches to the solution of this problem are discussed and the most promising one the method of least square error is described in detail A numerical approach based on this scheme is devised and values for the surface and back scattered far fields are given In effect the aperture and cavity provide a reactive load which modifies the scattering behavior of the complete shell or sphere and an example shows the cross section reduction achievable in this manner Experimental confirmation was obtained and the study is continuing Author

Fundamentals of Microwave Electronics V. N. Shevchik, 2014-06-20 Electronics and Instrumentation Volume 16

Fundamentals of Microwave Electronics provides an understanding of the phenomena that occur in the physics and technology of microwave electron devices. This book presents a systematic examination of the physical processes that take place in microwave electron devices. Organized into three parts encompassing seven chapters, this volume begins with an overview of oscillatory systems used in microwave electron devices. This text then explains the two fundamental methods of producing density modulation of an electron beam. Other chapters consider the energy exchange between an electron beam and an alternating electric field which is associated with a change in electron kinetic energy. This book discusses as well the basic operational principles of the various microwave electron devices. The final chapter deals with microwave devices with resonator or delay line circuits. This book is a valuable resource for light electrical engineers. Students specializing in the microwave field will also find this book useful.

Statistical Theory of Signal Detection Carl W. Helstrom, 2013-10-22
