Assessment of Reading in International Studies Jenny Lenkeit, Knut Schwippert, 2020-05-21 This book brings together contributions from different scholarly contexts that address a diverse range of focused topics as well as empirical and conceptual perspectives on research with international studies Some chapters focus on technical aspects exploring opportunities for drawing causal inferences from the data and investigating biases originating in distributional scale properties Others are of a more conceptual nature addressing changes in the relevance of socio economic indicators across time and countries examining the exposure of mother tongue and English instruction on performance and investigating the effects of test construction on gender difference The discussion takes a much needed meta perspective on the usefulness of international large scale assessments for educational research and allows reflection upon possibilities and opportunities for their improvement This book was originally published as a special issue of *Assessment in Education Text Variability Measures in Corpus Design for Setswana Lexicography* Thapelo J. Otlogetswe, 2011-01-18 This book is about the design of a Setswana corpus for lexicography While various corpora have been compiled and a variety of corpora based research has been attempted in African languages no effort has been made towards corpus design Additionally although extensive analysis of the Setswana language has been done by missionaries grammarians and linguists since the 1800s none of this research is in corpus design Most research has been largely on the grammatical study of the language The recent corpora research in African languages in general has been on the use of corpora for the compilation of dictionaries and little of it is in corpus design Pioneers of this kind of corpora research in African languages are Prinsloo and De Schryver 1999 De Schryver and Prinsloo 2000 and 2001 and Gouws and Prinsloo 2005 Because of a lack of research in corpora design particularly in African languages this book attempts to fill that gap especially for Setswana It is hoped that the finding of this study will inspire similar designs in other languages comparable to Setswana We explore corpus design by focusing on measuring a variety of text types for lexical richness at comparable token points The study explores the question of whether a corpus compiled for lexicography must comprise a variety of texts drawn from different text types or whether the quality of retrieved information for lexicographic purposes from a corpus comprising diverse text varieties could be equally extracted from a corpus with a single text type This study therefore determines whether linguistic variability is crucial in corpus design for lexicography

Global Perspectives on Youth Language Practices Cynthia Groff, Andrea Hollington, Ellen Hurst-Harosh, Nico Nassenstein, Jacomine Nortier, Helma Pasch, Nurenzia Yannuar, 2022-02-07 Most journal articles edited volumes and monographs on youth language practices deal with one specific variety one geographical setting or with one specific continent This volume bridges these different studies and it approaches youth language from a much broader angle A global framework and a diversity of methodologies enable a wider perspective that gives room to comparisons of youth s manipulations and linguistic agency transnational communicative practices and language contact scenarios The research

presented addresses structural features of everyday talk and text youth identity issues related to specific purposes and contexts and sociocultural emphases on ideologies and belonging Combining insights into sociolinguistic and structural features of youth language the volume includes case studies from Asia Indonesia Australia and Oceania Arnhem Land New Ireland South America the Amazon Chile Argentina Europe Germany Spain and Africa Uganda Nigeria DR Congo Central African Republic South Africa It expands on existing publications and offers a more comparative and global approach without a division of youth s strategies in terms of geographical space or language family This collection including a conceptual introduction is of interest to scholars from several linguistic subfields working in different regional contexts as well as sociologists and anthropologists working in the field of adolescence and youth studies

'Along the Routes to Power'

Martin Pütz, Joshua A. Fishman, JoAnne Neff-van Aertselaer, 2011-12-22 The present volume grew out of the 30th International LAUD Symposium held on April 19 22 2004 at the University of Koblenz Landau in Landau Germany The conference Empowerment through Language was centrally concerned with the concept of power and or empowerment as observed in the status and use of language s and their speakers in bilingual and multilingual communities The book discusses the theoretical issues inherent in the relation between language and power the empowerment strategies involved in language policy and language planning situations and the issue of language endangerment in Africa i e the fate of minority languages and their speakers and the sociopolitical factors perpetuating their exclusion from access to knowledge and skills The volume constitutes a collection of papers by prominent linguists from many countries who explore the exciting interdisciplinary area of language power and linguistic empowerment Broadly speaking the papers focus on the theoretical and sociolinguistic problems related to the role of power in language policy and language planning situations in multilingual settings language choices code switches and associated topics Thus the aim of the volume is to open up language policy and language planning issues as observed in multilingual contexts nations institutions other settings and domains to the wider community of critical sociolinguistics by concentrating on the relationship between language and power More particularly it offers a decidedly sociolinguistic perspective to the study of language and power which likewise has been tackled from other perspectives in
