communities Handbook for Conducting Research on Human Sexuality Michael W. Wiederman, Bernard E. Whitley, Jr., 2012-12-06 Human sexuality researchers often find themselves faced with questions that entail conceptual methodological or ethical issues for which their professional training or prior experience may not have prepared them The goal of this handbook is to provide that guidance to students and professionals interested in the empirical study of human sexuality from behavioral and social scientific perspectives It provides practical and concrete advice about conducting human sexuality research and addresses issues inherent to both general social scientific and specific human sexuality research This comprehensive resource offers a unique multidisciplinary examination of the specific methodological issues inherent in conducting human sexuality research The methodological techniques and advances that are familiar to researchers trained in one discipline are often unfamiliar to researchers from other disciplines This book is intended to help enrich the communication between the various disciplines involved in human sexuality research Each of the 21 self standing chapters provides an expert overview of a particular area of research methodology from a variety of academic disciplines It addresses those issues unique to human sexuality research such as how to measure sexuality variables how to design studies recruit participants and collect data how to consider cultural and ethical issues and how to perform and interpret statistical analyses This book is intended as a reference tool for researchers and students interested in human sexuality from a variety of disciplines including psychology sociology family science health communication nursing medicine and anthropology

Handbook of Research on Communication Strategies for Taboo Topics Luurs, Geoffrey D., 2022-04-29 Social norms are valuable because they help us to understand guidelines for appropriate and ethical behavior However as part of that process cultures develop taboo behaviors and topics for group members to avoid Failure to discuss important topics such as sex drug use or interpersonal violence can lead to unwanted or unintended negative outcomes Improving communication about forbidden topics may lead to positive social and health outcomes but we must first develop the communication and coping skills to handle these difficult conversations The Handbook of Research on Communication Strategies for Taboo Topics seeks both quantitative and qualitative research to provide empirical evidence of the negative social and health outcomes of avoiding taboo conversations and provides communication and coping strategies for dealing with difficult topics Covering a range of issues such as grief and forgiveness this major reference work is ideal for academicians practitioners researchers counselors sociologists professionals instructors and students

The Specifics of communication in relation to sexuality III. Helping professions in relation to sexuality including persons with intellectual disability: Readiness for practice Štěrbová, Dana, Rašková, Miluše, 2021 The publication expands the researched issue of helping professions in relation to sexuality with the topic of the individual s personality and his attitude to sexuality in the context of the need for readiness for professional practice It is scientifically focused on research into attitudes beliefs and values related to human sexuality including people with mental disabilities from the perspective of representatives of the helping

professions The topic is supported by opinions on communication problems on sexual issues in general as well as opinions on abilities and skills to discuss and pass on information in the field of human sexuality including people with mental disabilities We consider it necessary to improve the professional readiness of persons for helping professions in relation to human sexuality in the level of knowledge and professional didactics because the results of the research showed the respondents perceived insufficient professional readiness

Ammerman, Michel Hersen, 2013-11-11 This book could not have been conceptualized or published 20 years ago Indeed it is doubtful that we could have organized the material for this handbook 10 years ago Over the last 20 years however the painstaking efforts of many clinical researchers working with a variety of resistive psychopathologies have resulted in specific psychotherapies and pharmacotherapies that are effective with a significant proportion of patients at least for some of the disorders Much clinical research remains to be carried out in the forthcoming decades But now that we are nearing the 21st century at least some statement about efficacy can be made In 1967 Gordon Paul succinctly stated that the ultimate goal of treatment outcome research is to determine What treatment by whom is most effective for this individual with that specific problem and under which set of circumstances p 111 At that time empirical evaluations of psychosocial and pharmacologic treatments were few and far between Methodological strategies for determining treatment effectiveness were also in the formative stage as exemplified by introduction of control groups that received inactive interventions i.e placebo and the relatively recent practice of comparing two or more treatments in addition to placebo In the almost three decades since Paul's oft quoted dictum both the quantity and the quality of treatment outcome research with adults have increased dramatically
