Each chapter incorporates a research and theory-based approach to the aging process. Content is comprehensive and focuses on caring for the older adult. The text examines the differences between normal aging conditions and clinical problems. Conditions, Competencies, and Roles in Gerontological Nursing section focuses on the process that nurses, especially clinical nurse specialists, use to impact gerontological nursing care. Nursing care plans provide the practitioner with nursing care scenarios applied to clinical practice. Expanded content on functional assessment including addressing communication issues, both verbal and non-verbal, alerts the reader to vital issues that may affect the patient's plan of care. Color insert visually complements material on the integumentary section as it illustrates some of the major integumentary conditions affecting the gerontologic population. Toward Better Health boxes provide key considerations for promoting healthy lifestyles. Assessment boxes emphasize specific physical tests and observations to make when assessing a patient.
