 This handbook presents the state of the art of quantitative methods and models to understand and assess the science and
 technology system Focusing on various aspects of the development and application of indicators derived from data on
 scholarly publications patents and electronic communications the individual chapters written by leading experts discuss
 theoretical and methodological issues illustrate applications highlight their policy context and relevance and point to future
 research directions A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources
 presenting both traditional and advanced approaches It addresses the main bibliographic metrics and indexes such as the
 journal impact factor and the h index as well as altmetric and webometric indicators and science mapping techniques on
 different levels of aggregation and in the context of their value for the assessment of research performance as well as their
 impact on research policy and society It also presents and critically discusses various national research evaluation systems
 Complementing the sections reflecting on the science system the technology section includes multiple chapters that explain
 different aspects of patent statistics patent classification and database search methods to retrieve patent related information
 In addition it examines the relevance of trademarks and standards as additional technological indicators The Springer
 Handbook of Science and Technology Indicators is an invaluable resource for practitioners scientists and policy makers
 wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and
 research performance U.S. Government Research & Development Reports ,1970 *Resources in Education* ,1984
