Ramified Natural Theology in Science and Religion Rodney Holder, 2020-10-15 This book offers a rationale for a new ramified natural theology that is in dialogue with both science and historical critical study of the Bible Traditionally knowledge of God has been seen to come from two sources nature and revelation However a rigid separation between these sources cannot be maintained since what purports to be revelation cannot be accepted without qualification rational argument is needed to infer both the existence of God from nature and the particular truth claims of the Christian faith from the Bible Hence the distinction between bare natural theology and ramified natural theology The book begins with bare natural theology as background to its main focus on ramified natural theology Bayesian confirmation theory is utilised to evaluate competing hypotheses in both cases in a similar manner to that by which competing hypotheses in science can be evaluated on the basis of empirical data In this way a case is built up for the rationality of a Christian theist worldview Addressing issues of science theology and revelation in a new framework this book will be of keen interest to scholars working in Religion and Science
