Register of Educational Research in the United Kingdom, 1978 **Forty-five New Force and Motion Assessment Probes** Page Keeley, Rand Harrington, 2010. Nationally known science educator Page Keeley, principal author of the hugely popular four-volume NSTA Press series *Uncovering Students' Ideas in Science*, has teamed up with physicist and science educator Rand Harrington to write this first volume in their new series on physical science. They begin with one of the most challenging topics in physical science: force and motion. The 45 assessment probes in this book enable teachers to find out what students really think about key ideas in force and motion. The Teacher Notes, which can be used before and after administering the probe, provide background information on the purpose of the probe, related concepts, an explanation for the teacher of the force and motion idea being taught, related ideas in Benchmarks for Science Literacy and the National Science Education Standards, research on typical student misconceptions related to the force and motion concept, and suggestions for instruction and assessment. The book specifies grade spans K-4, 5-8, 9-12 for each probe based on state and national standards and suggests ways to adapt a probe for a different grade span or context. **Assessment for Effective Teaching** Gerald S. Hanna, Peggy Dettmer, 2004. Written in a straightforward and conversational manner, this book integrates assessment and instruction to provide educators with an understanding of when and why to use different assessment techniques to optimize student learning. Emphasis is on realistic applications taken from the author's experiences using mainstream assessment principles. The subject matter in each chapter is frequently expanded with examples from a broad range of educational settings, ranging from classroom teaching to school administration, school counseling, special education, and related special services for students with special needs. Features: Discussion of individual differences among students helps readers understand the reality of individual differences so as to employ assessment to influence learning for all students. Separate chapters on product assessment with rubrics and performance assessment methods present balanced and contemporary treatment of authentic assessment. Chapters 8 and 9: Simple, easily managed data sets and computation exercises for developing concepts throughout the text eliminate intricate calculations that often get in the way of important principles. An entire chapter (13) on assessment issues in special education helps readers address the thicket of special education issues and mandates in which assessment plays a vital role. Learning aids such as Discussion Questions, Thinking Cap Exercises, and computational problems are embedded throughout the book to provide assistance in identifying key issues, checking comprehension, and review. Instructor's Manual, Test Bank developed by the authors is available to adopters. Companion website for students and instructors is available at www.ablongman.com/hannadettmer.
