Green Energy Economies John Byrne,Young-Doo Wang,2017-09-08 Green Energy Economies offers insight into the major drivers that are shaping a new future powered by clean energy sources Assembling cutting edge researchers as contributors the book provides a comprehensive account of the shift underway examining in detail the complexities and intricacies involved with such a transition The book first details the promises and problems of a green energy transition Next it explores the economic benefits that a comprehensive strategy toward a green energy economy might create Then it investigates how communities will be affected and explores the social cultural and other changes that are likely to result Finally it explores the shift toward new technologies in depth Green Energy Economies concludes with policy options that support a transition to a better energy environmental and economic future The contributors argue that a green energy economy offers great promise but its realization will require making hard choices and soon They argue for investments in renewable energy and economic systems that can deliver a sustainable and equitable future This book makes a forceful case for a green future

Natural Hazards and Disaster Risk Reduction Carina Fearnley,Emily Wilkinson,Catherine J. Tillyard,Stephen J. Edwards,2016-04-08 Building upon presentations given during the conference on Disaster Risk Reduction for Natural Hazards Putting Research into Practice held at University College London in November 2009 the articles collected in this book examine how natural hazards research is accessed and used by practitioners and decision makers and conversely how policy and practice inform research As with the conference this book successfully brings together views from humanitarian and development agencies academia business government and funding bodies It is rare to engage such a wide range of sectors in a discussion relating to the issues of disaster risk reduction from a natural hazards perspective and the book captures this interaction and the resultant exchange of ideas thus providing an insight into how stakeholders respectively undertake or engage with natural hazards research Collectively the articles highlight the need for greater dialogue understanding and collaboration between all these sectors if research is to be made relevant and generate significant impact on risk reduction policy and practice There is an urgent requirement to better understand the respective needs ways of working project timescales and funding mechanisms for disaster risk reduction as well as the challenges posed by institutional and organizational structures and functions These issues must be overcome to ensure that ultimately and

most significantly discussions turn into positive practical actions so that research on natural hazards is relevant and applicable The book represents a step in that journey This book was published as a special issue of Environmental Hazards
