The Quality of Divided Democracies Licia Cianetti, 2019-02-20 The Quality of Divided Democracies contemplates how democracy works or fails to work in ethnoculturally divided societies. It advances a new theoretical approach to assessing quality of democracy in divided societies and puts it into practice with the focused comparison of two divided democracies: Estonia and Latvia. The book uses rich comparative data to tackle the vital questions of what determines a democracy's level of inclusiveness and the ways in which minorities can gain access to the policy-making process. It uncovers a presence/polarization dilemma for minorities' inclusion in the democratic process, which has implications for academic debates on minority representation and ethnic politics, as well as practical implications for international and national institutions' promotion of minority rights.

Beyond Punishment? Zachary Hoskins, 2019-03-25 In Beyond Punishment, Zachary Hoskins offers a philosophical examination of the collateral legal consequences of conviction. Considering how pervasive collateral restrictions have become and the dramatic effects such restrictions have on offenders' lives, Hoskins examines whether these extended measures of punishment are ever morally justified.

Oxford Textbook of Otolaryngology John S. Phillips, Steven M. Powell, Rajiv Bhalla, Vinidh Paleri, 2025-10-16 Otorhinolaryngology (head and neck surgery) ORL/HNS is a surgical subspecialty that affects all age groups and covers a wide range of pathologies and treatments, from the commonest of conditions seen in primary care to some of the rarest requiring tertiary investigation and state-of-the-art treatments. This makes it difficult for those training and working in ORL/HNS and its allied specialities to learn about and keep up to date with all its component parts. The Oxford Textbook of Otolaryngology provides a solution: a comprehensive guide to all aspects of the speciality. The textbook covers all the knowledge that clinicians from all subspecialties of otolaryngology require to keep abreast of current practice, with a strong emphasis on evidence-based practice. The textbook is divided into sections on Otolaryngology, Audiology, Rhinology, Head and Neck Surgery, and Paediatric Otolaryngology. These sections are then further divided into two broad sub-sections: the first covering common presenting symptoms and signs, and the second covering specific conditions. The introductory chapters of this book aim to provide insight into emerging aspects of medicine that are essential for the day-to-day practice of otolaryngology, before moving on to the more specific areas highlighted. The textbook is the perfect resource to aid an otolaryngology trainee in passing key

examinations while also suitable for established specialists to help remain up to date and to meet the necessary requirements for revalidation

Davis, 2024-01-04 *Creolizing Critical Theory* highlights the Caribbean as a philosophical site from which for centuries and until today theorists have articulated pressing critiques of capitalism and colonialism Some of these critiques such as those of the Saramaka Maroons have stressed the value of autonomy Others such as those of the West Indies Federation have emphasized solidarity in the face of European occupation Critical Theory as an emancipatory project rooted in the values of autonomy solidarity and equality then has long been a Caribbean practice Drawing on a range of voices *Creolizing Critical Theory* centers Caribbean critiques with a view toward praxis in the present

Philosophy for Everyone Matthew Chrisman, Duncan Pritchard, Guy Fletcher, Elinor Mason, Jane Suilin Lavelle, Michela Massimi, Alasdair Richmond, Dave Ward, 2016-07-15 *Philosophy for Everyone* begins by explaining what philosophy is before exploring the questions and issues at the foundation of this important subject Key topics in this new edition and their areas of focus include Moral philosophy the nature of our moral judgments and reactions whether they aim at some objective moral truth or are mere personal or cultural preferences and the possibility of moral responsibility given the sorts of things that cause behavior Political philosophy fundamental questions about the nature of states and their relationship to the citizens within those states Epistemology what our knowledge of the world and ourselves consists in and how we come to have it and whether we should form beliefs by trusting what other people tell us Philosophy of mind what it means for something to have a mind and how minds should be understood and explained Philosophy of science foundational conceptual issues in scientific research and practice such as whether scientific theories are true and Metaphysics fundamental questions about the nature of reality such as whether we have free will or whether time travel is possible This book is designed to be used in conjunction with the free Introduction to Philosophy MOOC massive open online course created by the University of Edinburgh's Eidyn research centre and hosted by the Coursera platform www.coursera.org/course/introphil This book is also highly recommended for anyone looking for a short overview of this fascinating discipline

Mapping and Measuring Deliberation André Bächtiger, John Parkinson, 2019-01-03 Deliberative democracy has challenged two widely accepted nostrums about democratic politics that people lack the capacities for effective self government and that democratic procedures are arbitrary and do not reflect popular will indeed that the idea of popular will is itself illusory On the contrary deliberative democrats have shown that people are capable of being sophisticated creative problem solvers given the right opportunities in the right kinds of democratic institutions But deliberative empirical research has its own problems In this book two leading deliberative scholars review decades of that research and reveal three important issues First the concept deliberation has been inflated so much as to lose empirical bite second deliberation has been equated with entire processes of which it is just one feature and third such processes are confused with democracy in a deliberative mode more generally In other words studies frequently apply micro level tools and concepts to make macro and

meso level judgements and vice versa Instead B chtiger and Parkinson argue that deliberation must be understood as contingent performative and distributed They argue that deliberation needs to be disentangled from other communicative modes that appropriate tools need to be deployed at the right level of analysis and that scholars need to be clear about whether they are making additive judgements or summative ones They then apply that understanding to set out a new agenda and new empirical tools for deliberative empirical scholarship at the micro meso and macro levels *A Crisis of Democratic Accountability* Randall Stephenson,2018-07-26 This book undertakes a comparative study of the public interest and political speech defences in defamation law particularly from the perspective of the misuse of democratic free expression justifications Specifically it argues that the law and legal approaches taken by leading courts and legislatures in the UK Australia New Zealand Canada and the United States five common law comparators are undertheorised lack adequate criteria for determining the correct form of the defence and would benefit from a more precise understanding of democracy accountability and representation The book will be of great interest to scholars of free speech defamation and public law

constitutionalism as the prevailing constitutional legal and political theory Central to this analysis is the impact of constitutional de secularization on the regulation of equality in liberty that is both the regulation of constitutional rights and the scope for equality of those who are granted such rights The book argues that equal liberty forms an essential part of constitutionalism as a theory and that constitutionalism therefore entails a continuous development towards expanding it The first and second part of the book presents a conceptual framework for the study of constitutional de secularization The third part presents and analyses three cases of constitutional de secularization in Afghanistan Iran and Iraq The book will be of interest to researchers and policy makers interested in constitutional history and theory and the role of religion in law and its compatibility with human rights

The Health of Newcomers Patricia Illingworth, Wendy E. Parmet, 2017-01-24 Immigration and health care are hotly debated and contentious issues Policies that relate to both issues to the health of newcomers often reflect misimpressions about immigrants and their impact on health care systems Despite the fact that immigrants are typically younger and healthier than natives and that many immigrants play a vital role as care givers in their new lands native citizens are often reluctant to extend basic health care to immigrants choosing instead to let them suffer to let them die prematurely or to expedite their return to their home lands Likewise many nations turn against immigrants when epidemics such as Ebola strike under the false belief that native populations can be kept well only if immigrants are kept out In The Health of Newcomers Patricia Illingworth and Wendy E Parmet demonstrate how shortsighted and dangerous it is to craft health policy on the basis of ethnocentrism and xenophobia Because health is a global public good and people benefit from the health of neighbor and stranger alike it is in everyone s interest to ensure the health of all Drawing on rigorous legal and ethical arguments and empirical studies as well

as deeply personal stories of immigrant struggles Illingworth and Parmet make the compelling case that global phenomena such as poverty the medical brain drain organ tourism and climate change ought to inform the health policy we craft for newcomers and natives alike
