Rte Annual Report 2007:

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille, 2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis

Redeploying Urban Infrastructure Jonathan Rutherford, 2019-07-31 This book explores urban futures in the making as seen through the lens of urban infrastructure The book describes how socio technical arrangements of energy and water provision are being recast in continuing efforts towards realising sustainable transformation of cities It critically investigates how infrastructure comes to matter by analyzing the shifting capacities and entanglements of diverse actors with these systems the various means they use to envision enact and contest changes and the wide ranging social and political implications of emerging infrastructure transitions Drawing on original research into urban infrastructure debates and projects in Stockholm and Paris the author develops a novel conceptual framework for studying and acknowledging the active vital role of infrastructure in constituting a material politics of urban transformation Straddling the latest theoretical insights and empirical investigation of urban planning practice and socio technical engineering of systems and flows Redeploying Urban Infrastructure forges new timely reflections and perspectives which will be of interest to the growing multidisciplinary community of scholars investigating infrastructure and to academics and practitioners with a concern for understanding the wider politics of urban futures

Who Owns the World's Media? Eli M. Noam, 2016 Who Owns the World's Media moves beyond the rhetoric of free media and free markets to provide a dispassionate and data driven analysis of global media ownership trends and their drivers Based on an extensive data collection effort from scholars around the world the book covers 13 media industries including television newspapers book publishing film search engines ISPs wireless telecommunication and others across a 10 25 year period in 30 countries

What Kind of Death Govert den Hartogh, 2022-10-31 Many books have been published about physician assisted death This book offers a comprehensive and in depth examination of that subject but it also extends the discussion to a broader range of end of life decisions including suicide palliative care and sedation until death In every jurisdiction that has laws permitting some kind of physician assisted death a central point of controversy is whether such

assistance should only be available to dying patients or to everyone who wants to end his life The right to determine the manner and time of one's own death however does not necessarily mean that physicians should be permitted to cooperate in ensuring a quick and peaceful death In this book Govert den Hartogh considers the fundamental and practical matters including concrete issues of legal regulation related to end of life decision making He proposes a two tiered system Everyone should have access to humane means of ending his life if his decision to end it is voluntary well considered and durable But doctors should only participate in a joint action of ending the patient's life on his request if they also are convinced of acting in the patient's best interests in particular by ending intolerable and unrelievable suffering And perhaps there is reason to restrict that second service to dying patients The whole argument however depends on the extent to which in both tiers of the system we can design legal safeguards that will enable us to trust judgments about the requesting person's request and about his suffering The book considers much new evidence in regard to this issue What Kind of Death will appeal to researchers and advanced students working in bioethics applied ethics philosophy of law and health law *Annual Report India. Department of School Education & Literacy, 2011* The Right to Die with Dignity Derya Nur Kayacan, 2022-06-20

Can I choose to die As the number of requests for euthanasia and physician assisted suicide continues to rise human rights law faces a new conflict the right to die vs the right to life The right to die or in other words the right to choose the time and manner of one's own death is a question of personal autonomy and its limits This book provides a comprehensive understanding of the right to die and sheds light on its possible future under the European Convention on Human Rights After setting a clear framework by defining the key terminology the book takes a two part approach to achieving its aim The first part focuses on the right to die in practice by examining selected jurisdictions Switzerland which is famous for its assisted suicide organizations and the Netherlands which was the first country to legalize euthanasia are examined in detail Belgium Germany the United Kingdom and as an exception to the Convention perspective Canada are also included While this examination offers a better understanding of what the right to die looks like in practice it also provides insights on the slippery slope argument which serves as a counterweight to personal autonomy without making a definitive statement on its validity This part also illustrates the different paths that led or did not lead to the right to die in practice The second part is an analysis of the European Court of Human Rights case law on the right to die The Court has made important statements in only very cases while its caution when approaching such a delicate and controversial topic among its 47 members is understandably emphasized This analysis of the Court's approach to the balancing of personal autonomy against other interests allows us to take a look back at the practice in more permissive jurisdictions through the lens of the Convention Taken together the book's two parts provide valuable lessons for countries that decide to practice assisted dying which are outlined in the conclusion In addition given that a purely legal approach can only offer a partial picture the book argues that an interdisciplinary approach would be much more favorable in terms of providing the necessary basis for the right to die

debate **Death and Dying** Diane Andrews Henningfeld, 2010-07-16 This book offers a collection of twenty three essays that examines viewpoints on death and dying from around the world Causes of death are examined including increases in mortality due to AIDS in Africa drug abuse in Scotland and suicide in Ireland Chapters discuss access to palliative end of life care and assisted suicide Readers will evaluate the influences of the world s major religions and their beliefs traditions and rituals surrounding death They will also learn about funeral practices throughout the world Essay sources include Open Society Institute A P Online New Vision Hiroko Nakata Francesca Crippa Floriani JoAnne M Youngblut and Dorothy Brooten
