Subramaniam,2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic regions Yet the mainstream discourse in international handbooks does not lend voice to developments in cognition curriculum teacher development assessment policy and implementation of mathematics and science in many countries Paradoxically in spite of advances in information technology and the flat earth syndrome old distinctions and biases between different groups of researcher s persist In addition limited accessibility to conferences and journals also contribute to this problem The International Sourcebooks in Mathematics and Science Education focus on under represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education The First Sourcebook on Asian Research in Mathematics Education China Korea Singapore Japan Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe North America and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and NCTM perspectives **Code of Federal Regulations** ,2015 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries **Now the Chips Are Down** Alison Gazzard,2016-02-12 The story of a pioneering microcomputer its beginnings as part of a national Computer Literacy Project its innovative hardware and its creative uses In 1982 the British Broadcasting Corporation launched its Computer Literacy Project intended to introduce interested adults to the world of computers and computing The BBC accompanied this initiative with television programs courses books and software an early experiment in multi platform education The BBC along with Acorn Computers also introduced the BBC Microcomputer which would be at the forefront of the campaign The BBC Micro was designed to meet the needs of users in homes and schools to demystify computing and to counter the general pessimism among the media in Britain about technology In this book Alison Gazzard looks at the BBC Micro examining the early capabilities of multi platform content generation and consumption and the multiple literacies this approach enabled not only

in programming and software creation but also in accessing information across a range of media and in do it yourself computing She links many of these early developments to current new media practices Gazzard looks at games developed for the BBC Micro including Granny s Garden an educational game for primary schools and Elite the seminal space trading game She considers the shift in focus from hardware to peripherals describing the Teletext Adapter as an early model for software distribution and the Domesday Project which combined texts video and still photographs as a hypermedia like experience Gazzard s account shows the BBC Micro not only as a vehicle for various literacies but also as a user oriented machine that pushed the boundaries of what could be achieved in order to produce something completely new

Contested Empire Sam W. Haynes,Gerald D. Saxon,2015-08-06 To a large degree the story of Texas secession from Mexico has been undertaken by scholars of the state Early twentieth century historians of the revolutionary period most notably Eugene Barker and William Binkley characterized the conflict as a clash of two opposing cultures yet their exclusive focus on the region served to reinforce popular notions of a unique Texas past Disconnected from a broader historiography scholars have been left to ponder the most arcane details of the revolutionary narrative such as the circumstances of David Crockett s death and whether William Barret Travis really did draw a line in the sand In *Contested Empire Rethinking the Texas Revolution* five distinguished scholars take a broader transnational approach to the 1835 36 conflict The result of the 48th Annual Walter Prescott Webb Memorial Lectures held at the University of Texas at Arlington in March 2013 these essays explore the origins and consequences of the events that gave birth to the Texas Republic in ways that extend beyond the borders of the Lone Star State
