**Important Warranty Information Regarding Television Format Viewing**

1) See the warranty card for more information on warranty terms.

Wide screen format LED Displays (LED), the aspect ratio of the screen width to height are primarily designed to view wide screen format full-motion video. The images displayed on them should primarily be in the wide screen 16:9 ratio format, or expanded to fill the screen if your model offers this feature and the images are constantly moving. Displaying stationary graphics and images on screen, such as the descriptions on no expanded standard format television video and programming, should be limited to no more than 5% of the total television viewing per week.

Additionally, viewing other stationary images and text such as stock market reports, video game displays, station logos, web sites or computer graphics and patterns, should be limited as described above for all televisions. Displaying stationary images that exceed the above guidelines can cause uneven aging of LED Displays that leave visible, but permanent burned-in ghost images in the LED picture. To avoid this, vary the programming and images, and primarily display full screen moving images, not stationary patterns or dark bars. On LED models that offer picture saving features, use these controls to view different formats as a full screen picture.

Be careful in the selection and duration of television formats used for viewing. Unusual LED aging as a result of format selection and use, as well as burned-in images, are not covered by your Samsung limited warranty.
