Jahangirnagar University Journal of Science, 2014 **Gender and Climate Change** Joane Nagel, 2015-09-25 Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the sometimes surprising differential gendered impacts of climate changes *Sea Level Variability and Change* Ivan D. Haigh, Marta Marcos, Sönke Dangendorf, Francisco Calafat, 2017-04-27 In June 2015 we held a workshop on the beautiful island of Mallorca Spain with a

focus on sea level variability and change Over 120 sea level experts from around the world attended this workshop from a range of different disciplines The main aims of the workshop were to 1 Evaluate the current state of knowledge of sea level science 2 Identify gaps and unresolved questions in any aspect of sea level science and 3 Design future research to address these issue All aspects of sea level changes were covered from global to regional observations and modelling processes driving mean sea level changes and extremes from the geological scale to the instrumental era and future projections and including impacts on the coastal zones This E Book presents papers that came out of that workshop Overall these papers illustrate the multi disciplinary nature of sea level research cross cutting many fields of research including oceanography meteorology geology coastal morphodynamics engineering and the social economic aspects Collectively theses articles represent an interesting range of perspectives and original studies that contribute to understanding the dynamic nature of sea level and its impacts across a wide range of time and space scales Enjoy reading them World Congress on Medical Physics and Biomedical Engineering, June 7-12, 2015, Toronto, Canada David A. Mesozoic Resource Potential in the Southern

Permian Basin B. Kilhams, P.A. Kukla, S. Mazur, T. McKie, H.F. Mijndieff, K. van Ojik, 2018-08-31 The Southern Permian Basin as its name suggests is a historical heartland for hydrocarbon production from the Palaeozoic Rotliegend interval. However in this mature basin the Mesozoic presents further possibilities to offer resource security to NW Europe. Such opportunities include increasing efficiency in the production of discovered hydrocarbons, exploration for further hydrocarbons both conventional and unconventional and efficient exploration for and production of geothermal energy. All these potential resources require a grounding in technically sound geoscience via traditional scientific observation and the application of new technologies to unlock their value. The main aim of this volume is to bring together the work of academics and industry workers to consider cross border geoscience including contributions on Poland, Germany, The Netherlands, the United Kingdom and adjacent areas. The work presented intends to contribute to the development and discovery of further Mesozoic energy resources across the basin. **Harald Fritzsch Memorial Volume** Gerhard Buchalla, Dieter Luest, Zhi-zhong

Xing, 2024-08-08 This book is a tribute to Harald Fritzsch 1943-2022 who has made outstanding contributions to the development of modern particle physics. He was a pioneer of QCD, the gauge theory of strong interactions and contributed significantly to Grand Unified Theories and to the physics of quark and lepton flavors. The present book collects reminiscences of Harald Fritzsch and scientific articles written by friends, colleagues, collaborators and former students. The contributed articles span a wide range of topics reflecting Harald's broad interests in physics from QCD and its applications at high and low energies, the flavor puzzle, flavor symmetries and textures to gravity, constants of Nature and fundamental symmetries and their violation. The authors of these articles include among others Siegfried Bethke, Johannes Blumlein, Stanley J Brodsky, Gerard 't Hooft, Heinrich Leutwyler, Hans Peter Nilles, Serguei T Petcov, Kok Khoo Phua and Willibald Plessas.

Martin Folkes (1690-1754) Anna Marie Roos, 2021-04-15 Martin Folkes 1690-1754 Newtonian Antiquary Connoisseur is a cultural and intellectual biography of the only President of both the Royal Society and the Society of Antiquaries. Sir Isaac Newton's protégé, astronomer, mathematician, freemason, art connoisseur, Voltaire's friend and Hogarth's patron, he was an intellectually vibrant world. Folkes was possibly the best connected natural philosopher and antiquary of his age, an epitome of Enlightenment sociability and yet he was a surprisingly neglected figure, the long shadow of Newton eclipsing his brilliant disciple. A complex figure, Folkes edited Newton's posthumous works in biblical chronology yet was a religious skeptic and one of the first members of the gentry to marry an actress. His interests were multidisciplinary, from his authorship of the first complete history of the English coinage to works concerning ancient architecture, statistical probability and astronomy. Rich archival material including Folkes's travel diary, correspondence and his library and art collections permit reconstruction through Folkes's eyes of what it was like to be a collector and patron, a Masonic freethinker and antiquarian and virtuoso in the days before science became subspecialised. Folkes's virtuosic sensibility and possible role in the unification of the Society

of Antiquaries and the Royal Society tells against the historiographical assumption that this was the age in which the two cultures of the humanities and sciences split apart never to be reunited In Georgian England antiquarianism and science were considered largely part of the same endeavour
