and why we often feel besieged by bad brain wiring Just like with the compulsions of OCD patients they discovered that bad habits social anxieties self deprecating thoughts and compulsive overindulgence are all rooted in overactive brain circuits The key to making life changes that you want to make your brain work for you is to consciously choose to starve these circuits of focused attention thereby decreasing their influence and strength As evidenced by the huge success of Schwartz s previous books as well as Daniel Amen s Change Your Brain Change Your Life and Norman Doidge s The Brain That Changes Itself there is a large audience interested in harnessing the brain s untapped potential yearning for a step by step scientifically grounded and clinically proven approach In fact readers of Brain Lock wrote to the authors in record numbers asking for such a book In You Are Not Your Brain Schwartz and Gladding carefully outline their program showing readers how to identify negative brain impulses channel them through the power of focused attention and ultimately lead more fulfilling and empowered lives
