**Bethesda Campus Capital Assets for Success in a Highly Competitive Global Biomedical Research Environment**

National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Infrastructure and the Constructed Environment, Committee on Assessing the Capital Needs of the National Institutes of Health, 2019-11-02 The National Institutes of Health NIH is the primary agency of the United States government responsible for biomedical and public health research Founded in the late 1870s NIH has produced extraordinary advances in the treatment of common and rare diseases and leads the world in biomedical research It is a critical national resource that plays an important role in supporting national security The 310 acre Bethesda campus supports some 20 000 employees and contractors and it contains more than 12 million square feet of facilities divided amongst nearly 100 buildings including the largest dedicated research hospital in the world The Bethesda campus supports some of the most sophisticated and groundbreaking biomedical research in the world However while some new state of the art buildings have been constructed in recent years essential maintenance for many facilities and the campus overall has been consistently deferred for many years The deteriorating condition of NIH s built environment is now putting its ability to fulfill its mission at substantial risk Managing the NIH Bethesda Campus s Capital Assets for Success in a Highly Competitive Global Biomedical Research

Environment identifies the facilities in greatest need of repair on the Bethesda campus and evaluates cost estimates to determine what investment is needed for the NIH to successfully accomplish its mission going forward Examining the Environmental Impacts of Materials and Buildings Brownell, Blaine Erickson, 2020-02-28 Fundamental environmental challenges such as climate change resource depletion and pollution are still widely relevant in today's world. Many of these problems have been associated with the architecture engineering and construction industries due to the level of resources used in these professions. In recent years many manufacturers in these fields have expressed the motivation to make necessary changes that would be beneficial to the environment. Despite this progress there remains a lack of research and assessment on the methods to achieve environmental stability within these architectural fields. Examining the Environmental Impacts of Materials and Buildings provides emerging research exploring the theoretical and practical aspects of ecological performance within modern building design and materials based construction. Featuring coverage on a broad range of topics such as life cycle assessment material flows analysis and sustainability this book is ideally designed for architects civil engineers construction professionals environmentalists ecologists business practitioners scientists policymakers designers researchers and academicians seeking research on current trends in environmental performance within building design.

**Life-Cycle Civil Engineering: Innovation, Theory and Practice** Airong Chen, Xin Ruan, Dan M.
