Roll Stability Support (RSS)

Read and observe all Warning and Caution labeled alert messages in this publication. They provide information that can help prevent serious personal injury, damage to components, or both.

To prevent serious eye injury, always wear safe eye protection when you perform vehicle maintenance or service.

Park the vehicle on a level surface. Block the wheels to prevent the vehicle from moving. Support the vehicle with safety stands. Do not work under a vehicle supported only by jacks. Jacks can slip and fall over. Serious personal injury and damage to components can result.

If you require technical assistance, contact our Customer Service Center at 800-326-5246. Technical publications for all Monitor M4000 products are available on our website.

ACC is an advanced vehicle control system from Mercedes-Benz that reduces chances of a rollover and gives the driver better maneuverability and control. However, any vehicle may oversteer in some situations with or without ACC.

Having ABS does not allow drivers to take unnecessary risks. Make sure drivers do not take curves or turns faster than they would without ABS and always use safe driving techniques. Failure to do so can result in serious personal injury, damage to components, or both.

Monitor M&C's rail stability support provides an independent stability system for single, tandem or tri axle constant powered trailers equipped with or without suspensions. It is compatible with both steel and drum foundation brakes. The system consists of:

- An electronic control unit (ECU)/fuel injector valve assembly with built-in pressure sensors to monitor control and supply pressures, as well as an air bleed. A lateral accelerometer incorporated into the ECU monitors fueler stability.
- ROS power PSE adapter
- Two or four wheel speed sensors
- Diagnostic cable (bracket not provided)
- External control line pressure sensor and cable (optional)
- CANCO diagnostic software

- This installation guide covers 207M or 407M train AHS with AHS installations. Sensor installation procedures are based on 207M AHS product series.

- RGS is not available for 32-bit trailer installations.
 - RGS is not available for full trailers, studios or systems.
- **S:** Number of Sensors
- **M:** Number of Manipulator Joints

All ACS-113 probe assemblies are pre-programmed with default parameters. Normal testing is performed at a 1:1 relationship, in the dual measurement function of the system's function.

The ICC system can also be used with the load proportioning function active which provides braking based on the weight of the trailer. Please contact Meritor WABCO at 800-525-5240 for further details. The service technician at this number will be able to connect you with a Meritor WABCO engineer.
