and age to analyze the experience of young people involved in Hong Kong Scouting throughout the years both colonial and post colonial The book is richly illustrated with interesting and instructive images and relied heavily on a doctoral dissertation by the author though they are also significantly different in both structure and content It is a critical study aimed at both general readers and readers with more specific interests and should enrich their understanding of the histories of Scouting youth citizenship education the colonies the British Empire decolonization China and Hong Kong By reconstructing the evolution of Scouting from a niche movement for a handful of British boys before the First World War to a fully indigenized and co educational mass movement in the post colonial Hong Kong society it fills a gap in the historical studies of youth movements around the world By analyzing how the movement and the re construction of its particular brand of citizenship training reflected the development of the community it adds to our understanding of the political cultural and social history of Hong Kong often influenced by that of China By demonstrating the uniqueness of its evolution in the colonial context it provides useful comparative insights into the history of imperialism and colonial youth movements By exploring the choices made by local Scouting since Hong Kong s retrocession of sovereignty to China it compliments other studies on decolonization and post colonial citizenship
