Triage tagging:  
 -green: minor injuries; generally ambulatory with injuries that can wait until higher priority patients are treated; do not require life support  
 -yellow: urgent, non-life threatening injuries; able to have care delayed without significant increase in chances of mortality  
 -red: life-threatening requiring immediate intervention; good chance of recovery with care  
 -black: deceased or expectant

Resources and personnel are allocated in a manner that saves the most life and time

Priority is based on urgency and emergent care

**Nursing Interventions**

Relocate ambulatory or minimal care patients if not safe for discharge

Triage and tag incoming victims green, yellow, red, or black depending on extent of injuries

Assess victims of mass casualty events and terrorist attacks for shared symptoms that could indicate a biological or chemical threat

Be cautious of decontamination efforts from scene, isolate patients with exposure
