Astronomical unit (AU, or au) is a unit of length effectively equal to the average, or mean, distance between Earth and the Sun. A planet's orbital speed changes, depending on how far it is from the Sun. The closer a planet is to the Sun, the stronger the Sun's gravitational pull on it, and the faster the planet moves. The farther it is from the Sun, the weaker the Sun's gravitational pull, and the slower it moves in its orbit.

Use the text and table to answer the questions.

Average Distance of the Planets from the Sun		
Planet	Average Distance (mi)	Average Distance (AU)
