The Chosen Jerome Karabel, 2005 Drawing on decades of research Karabel shines a light on the ever changing definition of merit in college admissions showing how it shaped and was shaped by the country at large *Who Goes to America's Highly Ranked "national" Universities?* Jeffrey A. Owings, Timothy Madigan, Bruce Daniel, 1998 *Universities, Rankings and the Dynamics of Global Higher Education* Hans Peter Hertig, 2016-06-30 Global university rankings are now more than a decade old and this book uses the data they have produced to examine how the international landscape of universities has changed over the years It offers new insights into the power and limits of league tables a key element of globalized higher education that can be deplored but hardly ignored Case studies from Asia Europe and North America are explored to highlight the issues raised by a quantitative exercise that decontextualizes what is linked so strongly to local factors

Dean Jr., Deborah Y. Clarke, 2019-08-13 Colleges and universities stand to benefit greatly when businesspeople engage with them whether through governing boards alumni associations consulting arrangements philanthropy or other channels But many businesspeople are frustrated by the way institutions of higher education work or rather how they don't work Why do decisions in universities take so long and involve so many people Why aren't profit and growth top priorities for colleges Why can't the faculty be managed like any other employees Shouldn't alumni have a greater say as they continue to invest in their alma mater As leaders in higher education James W Dean Jr and Deborah Y Clarke have years of experience addressing these questions for a wide range of professionals outside the academy This book draws on their expertise to offer real world guidance for businesspeople who work with and seek to improve colleges and universities Dean and Clarke differentiate and clarify the motivations and structures that make universities unique among American enterprises And while they acknowledge the challenges that businesspeople often face when working with academic institutions they explain that understanding the distinct mission of higher education is essential to being able to effect change within these organizations Presenting insights from interviews with a wide range of stakeholders Dean and Clarke give succinct and practical advice for

working with universities The College Completion Glass—Half-Full or Half-Empty? Tiffany Beth Mfume,2018-12-21 Despite the Great Recession and looming student loan debt crisis college education remains the most proven invaluable lifetime investment and serves as the most reliable path to upward mobility and socioeconomic class reassignment Mfume suggests that the value added of even one year of college can be transformative As higher education professionals and partners continue to advocate for new and improved college retention and graduation measures The College Completion Glass Half Full or Half Empty Exploring the Value of Postsecondary Education presents a new paradigm for higher education one that focuses on the value added of postsecondary education as well as on student success beyond the traditional measure of college graduation rates a model which merges conventional practices and supports for students with non traditional partnerships with and advocacy from successful non completers **Research Handbook on University Rankings** Hazelkorn, Ellen,Mihut, Georgiana,2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact **University Rankings** Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

McGiboney, 2018-07-27 Effective leadership does not occur by chance Leaders must be trained and groomed for the daunting responsibility of leading organizations Research shows that half of the people currently in leadership positions will fail Why they fail and what can be done to prevent failure are the main subjects of this book It shows that effective leadership is possible and illustrates why and how based on research and case studies from an epidemiological perspective The epidemiological word determinant is used frequently and is a word that no other book on leadership uses Epidemiologists work from two basic principles namely that all diseases have determinants and that diseases do not occur randomly In other words there are always causes for diseases and patterns that describe how diseases spread Effective and ineffective leadership always have determinants that are not randomly distributed the impacts are uniformly and deeply spread throughout an organization Like the epidemiologists this book not only identifies leadership determinants but also provides research based antidotes at the end of each chapter along with a summary of the most salient points in the chapter This book offers examples of leadership and governance from the non profit sector businesses public and private education higher education and other organizations highlighting over 50 case studies to illustrate concepts about leadership U.S. News & World Report ,2009 **Handbook on Globalization and Higher Education** Roger King, Simon Marginson, Rajani

Gelber, 2020-06-23 A comprehensive history of evaluation in American higher education In *Grading the College* Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while

acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability Grading the College seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education

Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America's colleges and universities In this revealing

account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality
