Climate Change Epistemologies in Southern Africa Jörn Ahrens, Ernst Halbmayer, 2023-05-26 This book investigates the social and cultural dimensions of climate change in Southern Africa, focusing on how knowledge about climate change is conceived and conveyed. Despite contributing very little to the global production of emissions, the African continent looks set to be the hardest hit by climate change. Adopting a decolonial perspective, this book argues that knowledge and discourse about climate change has largely disregarded African epistemologies, leading to inequalities in knowledge systems. Only by considering regionally specific forms of conceptualizing, perceiving, and responding to climate change can these global problems be tackled. First exploring African epistemologies of climate change, the book then goes on to the social impacts of climate change, matters of climate justice, and finally institutional change and adaptation. Providing important insights into the social and cultural perception and communication of climate change in Africa, this book will be of interest to researchers from across the fields of African studies, sociology, anthropology, philosophy, political science, climate change, and geography.

Indigenous Archives in Postcolonial Contexts Mpho Ngoepe, Sindiso Bhebhe, 2023-12-06 *Indigenous Archives in Postcolonial Contexts* revisits the definition of a record and extends it to include memory, murals, rock art, paintings, and other objects. Drawing on five years of research and examples from Zimbabwe, Botswana, and South Africa, the authors analyse archives in the African context. Considering issues such as authentication, ownership, and copyright, the book considers how murals and their like can be used as extended or counter archives. Arguing that extended archives can reach people in a way that traditional archives cannot, and that such archives can be used to bridge the gaps identified within archival repositories, the authors also examine how such archives are managed and authenticated using traditional archival principles. Presenting case studies from organisations such as Gay and Lesbian Memory in Action, Archives GALA, and heritage projects such as the Makgabeng Open Cultural Museum, the authors also analyse Indigenous family praises and songs and explore how such records are preserved and transmitted to the next generation. *Indigenous Archives in Postcolonial Contexts* demonstrates how the voices of the marginalised can be incorporated into archives, making an important contribution to the effort to decolonise African archives. The book will be essential reading for academics and students working in archival studies, library, and information science, Indigenous studies, African studies, cultural heritage, history, and anthropology. **Textbook of**
